LETTER OF TRANSMITTAL

CENSUS OF PARTIAL EMPLOYMENT,
UNEMPLOYMENT, AND OCCUPATIONS,
Washington, D. C., June 30, 1938.

MY DEAR MR. PRESIDENT: I have the honor to transmit the volumes containing the final report on the Census of Partial Employment, Unemployment, and Occupations.

On January 1, 1938, I sent you a preliminary report on the number of persons who registered as totally unemployed or as emergency workers during the unemployment registration period from November 16 to November 20, 1937, together with preliminary data on the findings of the enumerative check census. The preliminary report on persons who registered as partly unemployed was transmitted on January 8, and on January 18 the first data for all States, counties, and cities of 10,000 or more were published.

The work of compiling and publishing the unemployment census has proceeded rapidly. All of the data in Volumes I, II, and III of this final report relating to the voluntary registration have been published in the form of separate State and national reports prior to this presentation in volume form. The results of the enumerative check, given in Volume IV, have required more analysis and these data are now presented for the first time.

Volume I of the final report contains the United States summary with a supplemental section on geographic divisions, and a section for each of the States, arranged alphabetically, from Alabama to Indiana. Volume II contains a section for each of the States from Iowa to New York, and Volume III, for the States from North Carolina to Wyoming, and the territories of Alaska and Hawaii. Volume IV presents the final results of the enumerative check census conducted in selected areas throughout the United States immediately following the general registration.

A much more complete registration than was anticipated by critics of the voluntary registration plan was realized because of generous public support. This was largely due to the unusual amount of voluntary cooperation, for which I have expressed my appreciation on several occasions.

The distribution, checking, and collection of the Unemployment Report Cards and the canvass for the enumerative check were conducted by the Post Office Department under the direction of Clinton B. Uttley and Frank Ellis, of the Division of Post Office Service. The receiving, editing, coding, tabulating, and the preparing of tables for final publication was done by the Bureau of the Census under the direction of William L. Austin, Director, and Dr. Leon E. Truesdell and Fred A. Gosnell, of the Bureau staff. Staff members of both the Division of Post Office Service and the Bureau of the Census cooperated with our staff in preparing the plans and procedures for the Unemployment Census. Additional technical assistance was rendered by the Technical Advisory Committee on the Unemployment Census of the Central Statistical Board, of which Dr. Stuart A. Rice was chairman. Administrative assistance was rendered by several members of the staff of the Department of Commerce, especially Malcolm Kerlin and T. H. Morris, and by the Treasury Department's Division of Accounts and Deposits.

Grateful acknowledgment is also made to Assistant Administrators Frederick F. Robinson and William E. Galvin, to Director of Information Frank R. Wilson, and to Technical Consultant Calvert L. Dedrick, of our staff, all of whom have been invaluable in planning and supervising the census, and to several of my other associates who have been most helpful.

The National Unemployment Census was a pioneering venture in the application of new methods of securing unemployment information. Much of the valuable data from the census is already being used by Federal, State, and local agencies in connection with their unemployment and relief problems. To date, more than 50,000 copies of State reports have been sent to persons requesting them, and more than 435 separate press releases giving data for States and cities have been circulated. The exceptional public demand has made it necessary to reprint the reports for 27 States.

Respectfully submitted.

JOHN D. BIGGERS,
Administrator.

THE PRESIDENT,
The White House.

TABLES FOR INDIVIDUAL STATES

The statistics for each State are presented in a series of 14 standard tables. The subjects covered by the State tables are indicated by the list of titles immediately following, and the page on which each table is to be found for any given State in this volume is shown in the tabular index below.

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE

Table

1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.
2. All classes by race, age, and sex.
3. All classes by occupational group, race, age, and sex.
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.
8. All classes by sex and industry group.

TABLES FOR COUNTIES

9. All classes by race, sex, and residence, with 1930 population.
11. All classes by age and sex.
13. All classes by occupational group and sex.

TABLES FOR CITIES OF 10,000 OR MORE

10. All classes by race and sex, with 1930 population.
12. All classes by age and sex.
14. All classes by occupational group and sex.

INTRODUCTION

The National Unemployment Census was taken in conformity with an Act of Congress (Pub. No. 409, 75th Cong.) approved August 30, 1937. This Act directed the President to take, on or before April 1, 1938, "... a census of partial and total unemployment and occupations, and including such other related information as shall be deemed in the public interest in the 48 States, the District of Columbia, and the Territories of Hawaii and Alaska."

This census was to provide information "... to aid in the formulation of a program for reemployment, social security, and unemployment relief for the people of the United States ..."

The Act provided that the furnishing of information should be voluntary, that the administering agency could call on other departments or agencies of the Federal Government for information relating to, and for assistance in connection with, the census, and that the President should make such rules and regulations as might be necessary to carry out the provisions of the Act.

A temporary organization under John D. Biggers, Administrator, was created to take the census. This organization performed the general services of planning, public information, and administration. It utilized the services of existing Federal agencies, especially the Post Office Department, the Bureau of the Census in the Department of Commerce, the Division of Accounts and Deposits of the Treasury Department, and the Central Statistical Board.

The main feature of this Unemployment Census was a voluntary registration of totally unemployed and partly unemployed persons and of persons on emergency work, effected through the use of a simple schedule designated the Unemployment Report Card. The official registration period extended from November 16 to November 20, 1937.

General plan of reports.—A preliminary count for the United States as a whole of persons who registered in the Unemployment Census was released on January 2, 1938. Preliminary figures for States, counties, and cities of 10,000 or more giving the basic classification by sex and by registration class were published in a preliminary report issued January 18.

The final reports of the Unemployment Census present the results of the detailed mechanical tabulations classifying all registrants further by age, race, occupation, industry, etc. These final tabulations have been published in a series of State bulletins in which the figures are presented for the State as a whole, for each city of 100,000 or more, and in somewhat less detail for all counties and all cities of 10,000 or more. These bulletins, bound in volumes with the summary report for the United States and a supplemental report on geographic divisions, form the major part of the final report of the census.

The eight standard base tables used in the Unemployment Census may be briefly outlined as follows:

Table 1.—Summary data by race, sex, and class, with comparative population data from the 1930 Census.

Table 2.—Age information by race, sex, and class.

Table 3.—Occupational information by race, and by age, sex, and class. (Table 4 in U. S. Summary.)

Table 4.—Data on the number of dependents, the number of other workers in the family, and farm residence, by sex and class. (Table 9 in U. S. Summary.)

Table 5.—Data on the number of weeks worked during the 12 months prior to the registration, and on the income received during the week of November 7 to 13, for persons who were "totally unemployed" or "partly unemployed." (Table 10 in U. S. Summary.)

Table 6.—Occupational data in combination with the number of weeks worked during the 12 months prior to the registration, for persons "totally unemployed" or "partly unemployed." (Table 11 in U. S. Summary.)

Table 7.—Number of hours worked during the week of November 7 to 13, for persons who registered as "partly unemployed." (Table 12 in U. S. Summary.)

Table 8.—Industrial classification by sex and class. (Table 13 in U. S. Summary.)

These tables are presented in parallel form for the United States, the geographic divisions, each State, and each city of 100,000 or more inhabitants. Standard Tables 1, 2, and 3 are presented in a condensed form as Tables 9 to 14 for counties and for cities of 10,000 or more. Except for the United States summary, the standard tables have been given identical numbers for all areas.

The United States summary report contains, in addition to the standard tables presented in all State reports, a series of analytical tables presenting significant ratios and percentages. It also contains a series of tables giving percentage distribution of the more important items in each State which bring together for convenient comparison the figures for all of the States.

For the United States as a whole and for each geographic division there is presented a detailed table showing by class and sex the registrants in each industry group by occupational groups. (Table 16 in U. S. Summary.) This table is not presented for areas smaller than geographic divisions.¹

The unemployment report card.—As directed by the Act of Congress providing for this census, the schedule used to secure the data, which is designated the Unemployment Report Card, was made up by a committee composed of the Secretary of Commerce, the Secretary of Labor, the Works Progress Administrator, the Chairman of the Social Security Board, the Chairman of the Central Statistical Board, and the Director of the Census. This committee consulted with the Administrator of the Unemployment Census on general administrative questions, but had the sole responsibility for determining the scope and contents of the Report Card. A facsimile of this card is presented on page XIII.

¹ The tabulation was made by States, but because of the large amount of space that would have been required for this detailed presentation the State tables were limited to one showing the occupation groups and another showing independently the industry groups. The State tabulations of industry group by occupational group are now in the files of the Bureau of the Census, however, and the data for any State can be furnished upon request accompanied by payment of the actual cost of their transcription.

Publicity.—Because of the importance of securing a complete and accurate voluntary registration of the unemployed and partly unemployed, every effort was made to give wide publicity to this undertaking.

Public cooperation was secured by utilizing all possible media of publicity: The President made a special appeal to the unemployed and partly unemployed in an evening broadcast on November 14; news-reel trailers were supplied without charge to movie theaters throughout the country; preset stories were prepared for all weekly newspapers; the Unemployment Report Card and all important instructions and announcements were translated into twenty foreign languages for the foreign language press and churches; posters were prepared for display in post offices and in store windows; spot radio announcements were given by more than 700 radio stations daily during the registration period; and several news commentators devoted radio time to this enterprise.

The mayors of more than 4,600 cities and towns throughout the United States appointed volunteer Citizens' Committees representing various interests in their communities to collaborate with the postmaster and give whatever assistance was possible to assure a complete registration. These committees provided publicity, furnished speakers at special meetings, created special subcommittees to deal with certain phases of the registration, and in many other ways supplemented the national publicity campaign.

Collection of data.—The facilities of the Post Office Department were made available for the distribution, collection, and local checking of the data. Post Office employees received special instructions concerning the census from the Postmaster General (see Appendix A, pages 125 to 132) as well as the general instructions contained in the Informational Pamphlet (see Appendix B, pages 133 to 135).

The Unemployment Report Cards were distributed on November 16, 1937, to dwellings throughout the United States and the Territories of Hawaii and Alaska. Each postal carrier or other employee distributing the Report Cards left at least one card at each dwelling, and more if he had reason to believe that two or more unemployed workers lived there. Additional cards were available at all post offices and from all carriers during the registration period from November 16 to November 20. Assistance in filling out the report cards was obtainable from carriers and at all post offices.

Cards filled out by persons who wished to register were mailed to the National Unemployment Census, in care of the local postmaster. Nonresident registrations were at once forwarded to the post office of residence. Thus, if a resident of Detroit registered while visiting in Cleveland, his card was forwarded to the Detroit post office. Registration cards from CCC camps were forwarded to the place of residence of the enrollees.²

² Special overprinted cards were used for enrollees in CCC camps. These cards were sent by the Civilian Conservation Corps to all camps in advance of the regular registration. In order to assure as complete a voluntary registration as possible of persons employed on emergency projects, and to provide some additional statistical data for the Works Progress Administration, a special WPA check card was filled out by each project supervisor for all emergency workers on his project. These cards were then sent to the local post office for checking with registrations, and were then forwarded to Washington.

Registration cards were checked for completeness of entry by clerks in the local post offices, and in the majority of cases where the registration cards were inadequately or improperly filled out they were taken back to the registrant by the carrier or by a special "contact" employee for correction or completion. (See Post Office Instructions, Appendix A, Sections 29-31.)

All cards received by post offices on or before November 21 were sorted as if for local mail delivery, and duplicate or questionable cards were so indicated by the regular carrier who served each given address. All Report Cards (including duplicate and questionable cards) were then forwarded by the local post office to the National Unemployment Census in Washington for tabulation.

Tabulation of data.—This voluntary registration presents statistical problems somewhat different from those of an enumerative census, but the office procedures were quite parallel. The facilities of the Bureau of the Census were utilized in the editing, coding, tabulating, and preparing of data for publication. Experienced employees of this Bureau selected, trained, and supervised a temporary staff of approximately 1,700 employees engaged in this phase of the work. This staff completed the initial editing, classifying, and counting of nearly 12,000,000 Report Cards in less than six weeks from the end of the registration period.

Census tabulating equipment, developed for the compilation of the decennial population census, was used to tabulate punch cards bearing information given on the Report Cards. Tables for the final reports were typewritten on printed forms prepared by the Bureau for offset printing, and the map in each final report was also prepared by the Bureau.

The enumerative check of selected areas.—In order to learn the variation between the number of unemployed who voluntarily returned Unemployment Report Cards and the number who would have been reported by an enumerative type census, a door-to-door canvass was conducted by postal carriers in selected areas immediately after the voluntary registration. The results of this check census of 1,640 well-distributed postal routes are presented in Volume IV of this report.

All data in Volumes I, II, and III of this report and in all State reports are from the voluntary registration, as indicated by the phrase "Persons Who Registered in the Unemployment Census" which appears in the title of each table.

Population data.—Population data from the last decennial census, April 1, 1930, are presented in several tables. These figures facilitate comparisons between States, cities, and counties. A footnote on standard Table 1 gives the estimated total population of each State for July 1, 1937, prepared by the Bureau of the Census. In order to secure a reasonably accurate base for calculating the approximate percentage of males and females who registered in each State, the sex ratios found in 1930 are applied to the total estimated population for each State in U. S. Summary Table 19. A more accurate estimate of the present sex ratio for the United States, though not available for individual States, is given in the report on the enumerative check (Volume IV).

For comparative purposes the number of gainful workers in each industry group in 1930 is presented in U. S. Summary Table 14. A person is classified as a gainful worker in the decennial census of population if he is over 10 years of age and is *usually* gainfully employed or is performing services as an unpaid worker in a family business or on a family farm, regardless of whether he is employed or unemployed at the time of the census. However, registrations in the 1937 Unemployment Census were limited to persons from 15 to 75 years of age; therefore, in presenting comparative 1930 data on occupational groups, persons under 15 and over 74 years of age have been excluded (U. S. Summary Tables 5 and 6).

The seven and one-half years between the 1930 census of population and the 1937 Unemployment Census have been a period of considerable population change in this country. Some communities which are dependent upon industries seriously affected by the depression or which have suffered severe droughts have lost in population. The 1930 population and gainful worker data, therefore, do not provide an entirely satisfactory base for rates and ratios of the unemployed for purposes of this census, but they are the only data of this kind available.

General population data are given by color or race in Table 1. In 1930 persons of mixed blood born in Mexico or of Mexican parentage were classified by the Bureau of the Census as Mexicans and formed a part of the class designated "other races." For the purposes of the Unemployment Census it was not feasible to provide a separate classification for Mexicans. Postal employees and local persons assisting in the registration were instructed to classify all Mexicans as "white." This is in keeping with the present practice of the Bureau of the Census. The absence of a direct statement on the Report Card instructing Mexicans to check "white" may have resulted in the registration of some Mexicans in the "other races" group. No adjustment has been made in the 1930 population figures presented in this report for the change in the classification of Mexicans.

Tabulation areas.—The tabulations of the Unemployment Census data may be divided into two main groups: First, those made for all counties and all urban places of 10,000 or more; and, second, those made for individual cities of 100,000 or more, for cities of 10,000 to 100,000 as a group for each State, and for the remainder of the State. Any tabulation presented for a State as a whole is therefore available also for each city of 100,000 or more; for the group of smaller cities indicated above; and for the remainder of the State—designated in the tables "Cities under 10,000 and rural areas." The tables in the United States reports are consolidations of these tabulations for smaller areas.

Because of the difficulties of geographic allocation already referred to, it was not found practicable to make a tabulation of the persons registering in this census for the entire urban area as defined by the Census (comprising incorporated places of 2,500 or more) or for the rural area. However, the general plan of tabulation and presentation of data gives

"urban" and "rural" unemployment figures based upon an "urban" classification of places having 10,000 or more inhabitants in 1930.

DEFINITION OF TERMS

Totally unemployed.—Under this classification are found all persons who registered as "Totally unemployed and wanting work," that is, those who checked Section (a) of Question 2 on the Report Card. In addition, this class includes some persons who checked both Section (a) and Section (b) of Question 2, but who indicated in answer to Question 7 that they had not worked during the previous week.

Emergency workers.—This class is made up mainly of persons who checked Section (c) only under Question 2 on the Report Card: "Working at WPA, NYA, CCC, or other emergency work." It includes appreciable numbers, however, of persons who checked Section (a) or Section (b) also, in addition to Section (c). These doubled-checked cases were all classified as emergency workers because employment on WPA, etc., seemed to be a more tangible and definite concept than total or partial unemployment, and because employees of the Works Progress Administration had been told to consider themselves as unemployed for purposes of this census. On the other hand, some persons on emergency projects were not fully employed on the projects and might properly register as partly employed on emergency work.

Unemployed, including emergency workers.—Those persons who registered as "totally unemployed" and those who registered as "emergency workers" may be considered as a single class for general purposes where one summary figure on the "unemployed" is desired. This combined class corresponds approximately to the definition of "unemployment" used in unemployment estimates. In recognition of this, these two registration classes have been added together into a single group designated "unemployed, including emergency workers" in all cases where both classes appear in summary tables for the United States as a whole, and in Table 1 for each State and geographic division.

In making comparisons of unemployed persons by sex it is particularly advisable to combine the totally unemployed and the emergency workers. In normal families consisting of a husband, wife, and children it is the practice of emergency agencies to provide employment for the husband alone unless he is disabled or not able to perform the type of work available. This selection results in the inclusion of a much larger proportion of males than of females among the emergency workers. The women in such families may be quite as "unemployed" as the men, but because they have been classified as secondary workers and were not on emergency projects at the time of the registration, they registered as totally unemployed, if at all. Thus, the combining of the two classes—those registered as totally unemployed and those registered as emergency workers—into a single class, provides a count of workers presumably available for private employment and eliminates the effect of emergency work programs on the apparent sex distribution of the unemployed.

Partly unemployed.—This class includes all persons who registered as "Partly employed and wanting more work," that is, those who checked the answer to Section (b) of Question 2, or who checked both Sections (a) and (b) but indicated under Question 7 some hours worked the preceding week.

Significance of the classification.—There are several logical distinctions between these classes. The partly unemployed and the emergency workers are engaged in some form of gainful activity, while the totally unemployed are not. The partly unemployed and the emergency workers receive some payment for their services. On the other hand, most emergency workers would in all probability be among the totally unemployed, except for the emergency work programs which have been substituted for direct relief in this country.

The partly unemployed should not be added to the totally unemployed and the emergency workers in any instance where the entire number of persons who are usually considered unemployed is desired. Many persons are normally in the class of the partly employed who do *not* want additional work. The distinction between the partly employed and the partly unemployed lies entirely in the needs and desires for more employment. In no case in this report are the partly unemployed added to either the emergency workers or the totally unemployed.

Age and ability qualification.—The data in this report are from those registrations submitted by persons from 15 to 74 years of age who reported that they were able to work. In keeping with the main purposes of the census to show the characteristics and distribution of the employable unemployed, all persons who indicated, in answer to Question 3 on the Report Card, that they were not able to work were excluded from the tabulations. For the same reason it was deemed advisable to exclude from tabulations the relatively small number of registrations of persons under 15 years of age and 75 years of age and over.

Rejected registrations.—The Unemployment Census set up several field and office safeguards against local padding of the registration by duplicate returns, fictitious and facetious registrations, the registration of employed persons who believed that they would secure advancement or a better position by turning in a registration card, etc. All registration cards were sorted by postal carriers serving the given addresses, and duplicate or questionable cards were so indicated by these carriers. (See Post Office Instructions, Appendix A, paragraph 34.) A total of 65,903 questionable registrations and 22,189 duplicate registrations were eliminated in this way. In the editing process the Report Cards were again

carefully examined and the following eliminations were made: 136,637 for failure to answer Question 2 on the Unemployment Report Card so as to permit classification; 272,230 because of admitted inability to work at the time of the registration; 37,602 because the registrant was under 15 years of age or 75 years of age and over; 24,505 because the registrant was employed or on strike; and 4,289 for other reasons, such as facetious or fictitious returns, only one or two questions answered, etc.

Farm residence.—A classification of registrants by sex, class, and farm residence is presented in Table 9. Postmasters and carriers supplied this information if it was not given by the registrant. No definition of a farm was given on the schedule. This may have resulted in some variation between the classification of persons in the Unemployment Census and that given in the 1930 Census of Population or the 1935 Census of Agriculture.

Other workers in the family.—Question 11 on the Report Card was "How many other workers are there in your family living in the same household with you?" The results of this inquiry are presented in Table 9. Some duplication between persons who registered and those reported as "other workers" is apparent and proper. Where two or more workers in a family were unemployed and registered, each would report the other. The data for single-worker households, that is, cases with no other workers, are of special economic and social significance.

Dependents.—A classification of all registrants by number of dependents reported in answer to Question 13 on the Report Card is also given in Table 9. In addition to minor children, aged parents, and others usually reported as dependents (for example, for purposes of taxation), registrants in this census properly reported wives and some unemployed adult members of their families. Also, two or more unemployed workers in a family quite properly reported their joint dependents. It is not statistically valid, therefore, to add the total number of dependents reported in order to get the total number of individuals dependent upon unemployed, or partly unemployed, persons in any area.

Weeks worked last year.—Each registrant was asked to report on the number of weeks worked during the 12 months preceding the registration—Question 8 on the Report Card. It should not be assumed that the number of weeks worked reported in answer to this question always represents full-time weeks. It is probable that in many instances the registrants worked only part time during the weeks reported. Because of the exclusion by definition on the Report Card of time spent on WPA, NYA, CCC, and other emergency work, no tabulations are presented on this subject for emergency workers.

Income.—A classification of registrants by amount of income reported for the week of November 7 to 13, 1937, is presented in Table 10 for persons who registered as totally unemployed and as partly unemployed. No report is made on the income of persons in the "emergency worker" class, because by a definition on the schedule relief payments and wages from work relief were not considered income for purposes of this census. There are two major reasons for the reporting of income by totally unemployed persons: (a) Some persons who registered as totally unemployed between November 16 and November 20 had been employed during the week of November 7 to 13, and (b) all receipts from rent, gifts, and other sources not related to immediate employment were included in the income reported.

Hours worked last week.—Table 12 presents the data on the number of hours worked during the week of November 7 to 13, 1937, for persons who were partly unemployed. This class includes some persons who were seasonally unemployed, some who worked regularly but on reduced hours, and some casual laborers. Although the data are tabulated in intervals of eight hours, or the equivalent of full-time employment, a registrant reporting eight hours worked during the week in question may have worked either one whole day or for a few hours on each of several days.

Occupational groups.—The specific occupations returned on the Unemployment Report Cards have been classified into nine major social-economic occupational groups. This classification, prepared by the Bureau of the Census, recognizes gradations of economic function as well as of skill. The nine specific groups, together with the principal occupational designations included in each are presented on page XII. The occupational designations in this list are those used in the classification of gainful workers in the decennial census of 1930.

A bulletin showing the composition and characteristics of gainful workers classified into social-economic groups has been published by the Bureau of the Census.³ This bulletin gives the 1930 census data for the United States, each State, and each city of 500,000 or more and for each industry. In order to attain age comparability between the 1930 census and the present registration, it is necessary to exclude those gainfully employed persons who in 1930 were under 15 and over 74 years of age. This correction has been made for the United States as a whole in Table 5, U. S. Summary.

A six-group classification which shows more sharply gradations of skill and function can be obtained by adding farmers to proprietors, managers, and officials and adding the three unskilled-worker groups, farm laborers, other laborers, and servant classes. The group designated "servant classes" should not be confused with what are ordinarily

spoken of as domestic and personal service employees; only the unskilled persons engaged in domestic and personal service are included in the "servant classes."

Where two or more occupations or industries were given on the Report Card, the registrant was classified in accordance with the first entry.

New workers.—Under this designation are found first-job seekers, persons who have not acquired a regular occupation, and persons seeking to reenter the labor market after a period of nongainful activity, such as housework in their own home. For all these registrants the entry "new worker" on the Report Card took the place of the entry of a specific occupation and industry. Where both an entry of "new worker" and an occupation were given on the Report Card, the registrant was classified in accordance with the occupation reported and not as a "new worker." For convenience in presentation, the age, sex, class, and race of new workers are shown in the standard occupational tables Nos. 3 and 13. New workers are excluded from all industry tables.

Of all persons who registered as "new workers," first-job seekers comprised probably the major part of those under 25 years of age, particularly those in the 15-19-year age group (see Table 3). New workers 25 years of age and over consist principally of those who are seeking to reenter the labor market or to acquire gainful employment. (See instructions accompanying Question 9 on the Unemployment Report Card.)

Industry groups.—All registrants were classified in accordance with the industry groups indicated in Table 13. In each instance these groups are comparable with those used in the 1930 census of population.

This classification is based upon information given by individuals rather than information given by the employers. In most instances, the industry given on the Report Card is that in which the individual worked when engaged in his usual occupation. Exceptions to this general rule are found in the case of some of the emergency workers. Emergency workers acquire skill in particular industries while working on the works projects and therefore tend to concentrate in those industries which are paralleled by work done on emergency programs.

Industry groups in combination with occupational groups.—The registrants in each industry group, by sex, are classified by occupational group in U. S. Summary Table 16 and Geographic Division Table 10. The relative numbers of clerical, skilled, and unskilled workers in the various industries who registered as unemployed are of considerable significance; and, conversely, the distribution of the registrants in the several occupational groups, especially of the skilled workers, the semiskilled workers, and the unskilled group designated "Other laborers," by industries is, perhaps, of even greater significance. These figures are not presented in the State reports. (See footnote 1, page VII.)

³Bureau of the Census, U. S. Department of Commerce, *A Social-economic Grouping of Gainful Workers of the United States, 1930*; by Alba M. Edwards; Washington: 1938.

SPECIFIC OCCUPATIONS IN EACH OCCUPATIONAL GROUP

Professional Persons

Actors and showmen
Architects
Artists, sculptors, and teachers of art.
Authors, editors, and reporters
Chemists, assayers, and metallurgists.
Clergymen
College presidents and professors
Dentists
Designers, draftsmen, and inventors
Lawyers, judges, and justices
Musicians and teachers of music
Osteopaths
Photographers
Physicians and surgeons
Teachers
Technical engineers
Trained nurses
Veterinary surgeons
Other professional pursuits
Chiropractors
Healers (not elsewhere classified)
Religious workers

Farmers (Owners and Tenants)

Proprietors, Managers, and Officials (except Farmers)

Foresters, forest rangers, and timber cruisers
Owners and managers of log and timber camps
Operators, managers, and officials—extraction of minerals
Builders and building contractors
Manufacturers
Managers and officials—manufacturing
Captains, masters, mates, and pilots
Garage owners, managers, and officials
Owners and managers—truck, transfer, and cab companies
Conductors—steam railroad
Officials and superintendents—steam and street railroads
Postmasters
Proprietors, managers, and officials¹—transportation
Bankers, brokers, and money lenders
Managers and officials—insurance companies
Proprietors, managers, and officials¹—trade
Managers and officials—real estate companies
Retail dealers
Wholesale dealers, importers, and exporters
Undertakers
Officials and inspectors—city and county
Officials and inspectors—State and United States
Billiard room, dance hall, etc., keepers
Directors, managers, and officials—motion-picture production
Keepers of charitable and penal institutions
Keepers of pleasure resorts, race tracks, etc.
Radio announcers, directors, managers, etc.
Theatrical owners, managers, and officials
Owners and proprietors—cleaning, dyeing, and pressing shops
Managers and officials—cleaning, dyeing, and pressing shops
Hotel keepers and managers
Laundry owners, managers, and officials
Restaurant, café, and lunchroom keepers

Clerks and Kindred Workers

Inspectors, scalers, and surveyors—log and timber camps
Baggagemen and freight agents—railroad
Ticket and station agents—railroad
Agents—express companies
Express messengers and railway mail clerks
Mail carriers
Radio operators
Telegraph messengers
Telegraph operators
Telephone operators
Advertising agents
Clerks in stores
Commercial travelers
Decorators, drapers, and window dressers
Inspectors, gaugers, and samplers—trade

Clerks and Kindred Workers—Con.

Insurance agents
Newsboys
Real estate agents
Salesmen and saleswomen
Abstractors, notaries, and justices of peace
Architects', designers', and draftsmen's apprentices
Apprentices to other professional persons
Officials of lodges, societies, etc.
Technicians and laboratory assistants
Dentists' assistants and attendants
Librarians' assistants and attendants
Physicians' and surgeons' attendants
Agents, collectors, and credit men
Bookkeepers, cashiers, and accountants
Clerks (except clerks in stores)
Messenger, errand, and office boys and girls
Stenographers and typists

Skilled Workers and Foremen

Farm managers and foremen
Foremen—log and timber camps
Foremen, overseers, and inspectors—extraction of minerals
Blacksmiths, forgers, and hammermen
Boilermakers
Brick and stone masons and tile layers
Cabinetmakers
Carpenters
Compositors, linotypers, and typesetters
Coopers
Electricians
Electrotypers, stereotypers, and lithographers
Engineers (stationary), cranimen, hoistmen, etc.
Engravers
Foremen and overseers—manufacturing
Puddlers
Glass blowers
Jewelers, watchmakers, goldsmiths, and silversmiths
Loom fixers
Machinists, millwrights, and toolmakers
Mechanics¹
Millers (grain, flour, feed, etc.)
Molders, foundrymen, and casters (metal)
Painters, glaziers, and varnishers (building)
Paper hangers
Pattern and model makers
Piano and organ tuners
Plasterers and cement finishers
Plumbers and gas and steam fitters
Pressmen and plate printers (printing)
Rollers and roll hands (metal)
Roofers and slaters
Sawyers
Shoemakers and cobbler (not in factory)
Skilled occupations (not elsewhere classified)
Stonecutters
Structural iron workers (building)
Tailors and tailoresses
Tinsmiths and coppersmiths
Upholsterers
Bus conductors
Conductors—street railroad
Foremen and overseers—steam and street railroads
Locomotive engineers
Locomotive firemen
Aviators
Foremen and overseers¹—transportation
Inspectors—transportation
Floorwalkers, foremen, and overseers—trade
Firemen—fire department
Marshals, sheriffs, detectives, etc.
Policemen
Foremen and overseers—cleaning, dyeing, and pressing shops
Foremen and overseers—laundries

Semiskilled Workers

Apprentices to building and hand trades
Apprentices (except to building and hand trades)—manufacturing
Bakers
Dressmakers and seamstresses (not in factory)
Dyers

Semiskilled Workers—Con.

Filers, grinders, huffers, and polishers (metal)
Milliners and milliner dealers
Ollers of machinery
Enamellers, lacquerers, and japanners
Painters, glaziers, and varnishers (factory)
Operatives¹—manufacturing
Boatmen, canal men, and lock keepers
Sailors and deck hands
Chauffeurs and truck and tractor drivers
Boiler washers and engine hostlers
Brakemen—steam railroad
Motormen—steam and street railroads
Switchmen, flagmen, and yardmen—steam and street railroads
Telegraph and telephone linemen
Apprentices—transportation
Other occupations—transportation
Apprentices—wholesale and retail trade
Deliverymen—bakeries and stores
Other pursuits in trade
Guards, watchmen, and doorkeepers
Soldiers, sailors, and marines
Other public-service pursuits
Other occupations—professional service
Attendants—pool rooms, bowling alleys, golf clubs, etc.
Helpers—motion-picture production
Theater ushers
Other attendants and helpers—professional service
Barbers, hairdressers, and manicurists
Boarding and lodging house keepers
Other operatives—cleaning, dyeing, and pressing shops
Housekeepers and stewards
Deliverymen—laundries
Other operatives—laundries
Midwives and nurses (not trained)
Other pursuits—domestic and personal service

Farm Laborers

Other Laborers

Fishermen and oystermen
Teamsters and haulers—log and timber camps
Other lumbermen, raftsmen, and woodchoppers
Coal-mine operatives
Other operatives in extraction of minerals
Firemen (except locomotive and fire department)
Furnace men, smelter men, and pourers
Heaters (metal)
Laborers¹—manufacturing
Longshoremen and stevedores
Draymen, teamsters, and carriage drivers
Garage laborers
Hostlers and stable hands
Laborers—truck, transfer, and cab companies
Laborers—road and street
Laborers, including construction laborers—steam and street railroads
Laborers¹—transportation
Laborers in coal and lumber yards, warehouse, etc.
Laborers, porters, and helpers in stores
Laborers—public service
Laborers—professional service
Laborers—recreation and amusement
Stage hands and circus helpers
Laborers—cleaning, dyeing, and pressing shops
Laborers—domestic and personal service
Laborers—laundries

Servant Classes

Boothlacks
Charwomen and cleaners
Elevator tenders
Janitors and sextons
Laundresses and laundresses (not in laundry)
Porters (except in stores)
Servants
Waiters

¹ Not otherwise specified.

FACSIMILE OF THE SCHEDULE SIDE OF THE UNEMPLOYMENT REPORT CARD

UNEMPLOYMENT REPORT CARD

Please fill out this card if you are totally or partly unemployed

Answer all questions promptly

It is important that EVERY totally or partly unemployed worker in your household fill out a SEPARATE report card. Additional cards can be secured from your postman or post office. You can get help in answering these questions, if you need it, at any post office or from any postal employee.

1. Print full name..... Do you live on a farm? _____
 Print full address..... (Yes or no)
 (First) (Middle) (Last) (Street and number or R. F. D.) (City, town, or village) (County) (State)

2. Are you: (Check only one)
 (a) Totally unemployed and want work? ☐
 (b) Partly employed and want more work? ☐
 (c) Working at WPA, NYA, CCC, or other emergency work? ☐

3. Are you able to work? (Check one) Yes ☐ No ☐

4. Age at last birthday..... years

5. Color }
 or race } (Check one) White ☐ Negro ☐ Other ☐

6. Sex (Check) Male ☐ Female ☐

7. How many hours did you work last week? _____ hours
 (If none, write "None")
 Enter total number of hours worked at ALL jobs (except WPA, NYA, CCC, or other emergency work) during the week from Sunday, November 7, through Saturday, November 13.

8. How many weeks did you work in the last 12 months? _____ weeks
 (If none, write "None")
 Enter total number of weeks worked at ALL jobs (except WPA, NYA, CCC, or other emergency work) during the 12 months from November 1, 1936, through October 1937.

9. What is your occupation, or kind of work? _____
 (Examples: Tool maker, waitress, watchman, farm laborer, etc.)
 The occupation which you give in answer to this question (number 9) describes the work you do. The answer to the next question (number 10) describes the kind of business or industry in which the work is done. Enter "New worker" in both questions 9 and 10 if you have never had a steady job, and want work. Do not give the name of your company or employer as an answer to question 10.

10. Kind of business or industry in which you did, or are doing, this kind of work? _____
 (Examples: Machine shop, restaurant, railroad, cotton farm, etc.)

11. How many other workers are there in your family living in the same household with you? _____ workers
 Count all persons working for pay or profit, or wanting work, except yourself.

12. How many of these workers are: (a) Totally unemployed and want work? _____ workers
 (b) Partly employed and want more work? _____ workers
 (c) Working at WPA, NYA, CCC, or other emergency work? _____ workers

Note.—Every totally or partly unemployed worker in your family should make out and return a separate report card.

13. How many persons are mainly dependent on you for support? (Do not count yourself) _____ dependents

14. What was your individual total income, cash and other, last week? \$ _____
 Do not include payments from relief, WPA, NYA, CCC, or other emergency work.

11-11011

Mail this card before midnight November 20, 1937. No postage stamp is needed

FACSIMILE OF THE MESSAGE OF THE PRESIDENT WHICH APPEARED ON THE ADDRESS SIDE OF THE UNEMPLOYMENT REPORT CARD

A MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

THE WHITE HOUSE
 WASHINGTON

TO EVERY WORKER:

If you are unemployed or partly unemployed and are able to work and are seeking work, please fill out this report card *right away* and mail it before midnight, Saturday, November 20, 1937. No postage stamp is needed.

The Congress directed me to take this census. It is important to the unemployed and to everyone in this land that the census be complete, honest, and accurate. If you give me the facts I shall try to use them for the benefit of all who need and want work and do not now have it.

LETTERS FROM THE ADMINISTRATOR TO THE PRESIDENT

The following letters to the President from the Administrator of the Census of Partial Employment, Unemployment, and Occupations were transmitted as preliminary reports on the progress and findings of the census. The first letter, dated January 1, gives the data on persons who registered as "totally unemployed" and as "emergency workers" on the basis of a preliminary count of the unemployment registration cards, and the preliminary results of the enumerative check census. The second letter, dated January 7, gives similar data for persons who registered as "partly unemployed." The third letter, dated February 24, gives the first results from the final tabulations for 16 States, and was accompanied by a summary table presenting consolidated data for this group of States. The fourth letter, dated May 12, gives a semifinal report on certain administrative aspects of the census.

REPORT TO THE PRESIDENT ON PERSONS WHO REGISTERED AS TOTALLY UNEMPLOYED OR EMERGENCY WORKERS

January 1, 1938.

The President,

The White House.

My Dear Mr. President: As Administrator of the Census of Partial Employment, Unemployment, and Occupations I respectfully submit this preliminary report on unemployment as revealed by the voluntary unemployment registration, November 16 to 20, 1937, and our subsequent enumerative test census.

Unemployment is difficult to measure. We approached this task with an appreciation of the difficulties but with a conviction that a knowledge of basic facts was a prerequisite to a sound solution of the unemployment problem.

A voluntary registration of the unemployed was undertaken because it offered the possibility of getting the essential information more promptly and at less cost than a Nation-wide enumerative census. However, as you know, we recognized from the outset that sole reliance could not be placed upon this or any other voluntary registration. Therefore, we conducted an enumerative test census of 1,950,000 people representing a cross section of the United States in order to appraise the completeness and accuracy of our voluntary registration. This combination of voluntary and enumerative methods seemed to be the best procedure available within the limits of time and cost.

The painstaking care with which the unemployment report cards were filled out surpassed all expectations. Careful checks in the field and in the process of tabulation resulted in rejection of less than 6 percent of all the cards sent in, although rejections of 10 to 20 percent had been anticipated. The principal reasons for rejection were inability to

work, duplicate registrations, unknown at address given, and under or over the age limit, 15 to 74. Your faith in the willingness of the people to cooperate in any undertaking for their own good and that of the Nation was fully justified.

The voluntary registration of those working for WPA, NYA, CCC, and on the other emergency work who, for the purposes of this census, were asked to register as unemployed was:

Male.....	1,662,444
Female.....	339,433
Total emergency workers.....	2,001,877

All others classified as totally unemployed, able to work, and wanting work numbered:

Male.....	4,137,370
Female.....	1,683,665
Totally unemployed workers.....	5,821,035

Thus the voluntary registration of totally unemployed including the emergency workers was 7,822,912 of which 5,799,814 were males and 2,023,098 females.

The enumerative test census heretofore mentioned was taken in 1,864 areas, selected at random, and distributed throughout the United States approximately in proportion to population. This house-to-house canvass covered more than $1\frac{1}{2}$ percent of the population of the United States and was made by the trained personnel of the Post Office Department during the week of November 29. The questions, however, applied to the employment status of those individuals at the time of the voluntary registration.

The voluntary registrations from the same identical areas have been compared with the results of this test census. According to a preliminary analysis for 1,455 areas, the voluntary registration was 72 percent of the number reported in the test census as totally unemployed, including emergency workers. The largest variation was among females. The percentage for males was 80 percent. These percentages of apparent completeness are regarded by the experts as exceptionally high for any type of voluntary registration, and are attributable to the efficiency with which the Post Office Department did its part of the job and to the exceptional support received from the press, the radio, the motion-picture industry and the mayors' committees, and other cooperating agencies in more than 4,000 cities and towns.

In determining the true measure of unemployment it is important to consider certain factors brought to light by the variation between the results of the voluntary census and the enumerative census.

The unemployed may be divided into two classes. One class represents those regular workers for wages who always work, when work is available, regardless of their immediate economic status. Work to them is not only a means of livelihood but a habit of life. These unemployed are clearly a part of the regular labor market.

There is also a second group consisting of those who are not regular workers for wages such as housewives, who seek wage jobs only when the family breadwinner is idle; daughters or sons who take jobs through choice rather than necessity; unpaid family workers on farms and in family stores, who seek wage jobs only when family income needs augmenting; retired people who, because savings have been depleted, decide to enter the labor market again. To this class unemployment is a status depending on their current inclinations and temporary economic conditions.

This second group made up of the occasional workers for wages might not take the trouble to respond to a voluntary registration but might readily be reminded to relate to a census enumerator their current inclination to work. For example, the proportion of women who reported themselves as unemployed was greater in the enumerative census than in the registration, though both exceeded the percentage of women reporting as unemployed in the 1930 census. It is expected that our detailed analysis will throw further light on this and similar questions.

Considering all of these factors, we do not claim provable accuracy for any one figure. The true number of those who considered themselves totally unemployed, able to work and wanting work, in our opinion, lies between 7,822,912, the number who responded to the registration, and 10,870,000, the number indicated by the enumerative census.

In formulating any program for reemployment of workers in industry, based upon the results of this census, a number of considerations must be borne in mind. For example, it is not to be assumed that because a certain number of people are jobless, the same number of jobs must be created to bring a return to normal conditions. When the usual family breadwinner is idle, two or perhaps more members of his family may enter the labor market. Conversely, when the breadwinner is satisfactorily reemployed other members of the family may withdraw from the labor market.

Then, too, you recognize, but it should perhaps be emphasized, that the number of people who reported themselves as unemployed should not be confused with the number of people who need financial assistance or relief. Many people consider themselves unemployed who are not financially compelled to work. Irrespective of their need, when they seek employment, they enter the labor market and compete with others who have jobs or vitally need jobs. They are, therefore, a factor in the unemployment problem though they may never seek relief.

Our figures reflect the decline in employment during the earlier stages of the current business recession but not the subsequent trend. If you desire additional information beyond that obtainable from the usual statistical sources, it would be possible, with the cooperation of the Post Office Department, to make at any future date a cross-sectional enumeration of our test areas which should be of value to you and the Congress. This in addition to all the other work contemplated by us could be carried through well within the \$5,000,000 budgeted for the purposes of this census.

We will submit to you tomorrow another report showing the distribution by States of total unemployment as revealed by the voluntary census following which there will be made available a break-down of this information by counties and by cities of 10,000 and more population, all according to sex. Subsequently, we will give you a report on the extent of partial unemployment, National, State, county, and city, likewise according to sex.

As the tabulation progresses we will report additional facts such as the age groups of the unemployed; their occupational classification; the kinds of business or industry in which they have worked and other related factors.

Fully appreciating the vital importance of a reemployment program and the contributing value of this information, the Bureau of the Census has cooperated with us by working three shifts a day, in order to expedite this work and permit the completion of our report to you at the earliest possible date, which will be by or before the end of March 1938.

In concluding this initial and partial report may I express my appreciation of the personal consideration which you have given to this undertaking and of the inestimable value of your counsel and support. I believe this undertaking will prove worthwhile not only because it provides new facts and figures about unemployment but because the wide popular consideration of this subject has focused the attention of the Nation upon the immediate necessity of formulating a long range program of reemployment.

Respectfully submitted.

John D. Biggers, Administrator.

REPORT TO THE PRESIDENT ON PERSONS WHO REGISTERED AS PARTLY EMPLOYED AND WANTING MORE WORK

January 7, 1938.

The President,

The White House.

My Dear Mr. President: As promised in my letter of January 1, transmitting a preliminary report on total unemployment in the United States as of November 16-20, I am now submitting to you a preliminary report on partial unemployment as revealed by the voluntary census and as indicated by the subsequent enumerative test census.

The voluntary registration of those partly employed and wanting more work was:

Male.....	2,641,660
Female.....	567,551
Total, partly unemployed.....	3,209,211

Just as soon as final tabulation of the answers to all of the fourteen questions can be completed, we will make available to you and to the Nation a wealth of data which should be helpful in formulating plans for reemployment. In fact, we place much greater value upon such information

than upon the enumeration approximation achieved in the fields of total and partial unemployment.

This information will include statistics as to age, color, farm or urban residence, occupational classification, industry, the number of weeks worked during the past year, the hours of employment during the week preceding registration, the number of workers in the family of each registrant, and the number of persons dependent upon the registrant.

Questions regarding partial unemployment were included on the voluntary registration card, as provided by law, but with full realization of the impracticability of accurately measuring such a variable quantity. The enumerative test census conducted over 1,455 postal routes immediately after the voluntary registration to check its completeness and accuracy demonstrated that it is more difficult to measure partial unemployment than total unemployment. The voluntary registration of the partially unemployed was only 57 percent of the number reported in our test census as compared with the 72 percent registration of the number reported to the enumerators as totally unemployed.

In our report on total unemployment we pointed out the difficulties of measuring the marginal group consisting of those who are not regular workers for wages. In the field of partial unemployment other factors make the appraisal even more complex. For example, it is difficult to get people to understand the important distinction between partial employment and partial unemployment. Many persons regularly work only part time and do not need or want more work. They are partially employed. Others are reduced to part-time work by force of circumstances, not by personal limitations or choice. They are partly unemployed.

Preliminary analysis indicates that a very considerable number have registered or reported themselves as partially unemployed when they clearly belong to the group of partly employed workers and should not have included themselves in either the voluntary or the test census.

Attention should also be called to the fact that the volume of partial unemployment reflects the prevalent "share-the-work" policy. Employers, oftentimes at the request of the workers, distribute the burden of unemployment among all of their workers to avoid imposing the extreme hardships of idleness on those who would otherwise have to be laid off. This is usually done with the hope that improved conditions will make it possible to bring all back to full-time employment, but during the interim the part-time workers may properly consider themselves partly unemployed.

We will have ready shortly a complete break-down by counties and by cities of 10,000 and more population of all of the numerical information covering total unemployment, partial unemployment, and those on emergency work. Aside from that this concludes my preliminary reports. Subsequent reports will be devoted to a digest of statistical information deemed of value in devising constructive long range plans for reemployment.

Respectfully submitted.

John D. Biggers, Administrator.

REPORT ON UNEMPLOYMENT IN 16 STATES

February 24, 1938.

The President,

The White House.

My Dear Mr. President: We have now completed tabulations for 16 States on certain phases of unemployment which give the Nation current knowledge of the characteristics and composition of its totally unemployed.

These tabulations cover age groups, sex, number of workers in the families of the unemployed, and number of dependents on each unemployed person as indicated by the replies on the Unemployment Report Cards distributed November 16, 1937, to every home.

These 16 States, mostly agricultural, are as follows: Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Georgia, Idaho, Iowa, Kentucky, Louisiana, Montana, Nevada, New Hampshire, New Mexico, and Oregon. The larger industrial States, yet to be tabulated, will change the percentages somewhat, but an analysis of the data from these 16 States clearly indicates that our compilations will have broad significance in showing State and regional differences on the major factors of unemployment.

On January 1, I reported to you that the total number of men and women in the United States who registered as unemployed including emergency workers was 7,822,912. We have always recognized that no type of unemployment census could determine the number of unemployed with mathematical accuracy and in announcing totals we deliberately adopted a conservative attitude.

Regardless of any uncertainty as to the exact number of unemployed, no doubt can exist as to the value or the significance of the statistics which this and subsequent reports will reveal.

I think it is apparent that a classification of the characteristics of nearly 8,000,000 unemployed persons represents such a large cross section of the unemployed that the disclosures may be accepted as dependable, irrespective of reasonable lapse of time or change in conditions. Therefore, these analyses when completed will be the most important contribution of the census, for a knowledge of these factors is vital to any program of reemployment.

The tabulations on the important subjects of work experience and industries in which the unemployed had previous employment are not yet completed. The partial analysis, however, of the cards of 1,300,546 registrants in these 16 States has developed the following significant facts:

AGE DISTRIBUTION.

Almost one-third of the unemployed, including emergency workers, were less than 25 years of age.

More than 50 percent were under 35.

More than two-thirds were under 45.

Slightly more than one-fourth of all registrants were 45 and over.

Four percent of the totally unemployed (not including emergency work-

ers) were between 65 and 74. In the same age group, emergency workers constituted less than 2 percent, indicating the removal of needy unemployed to Old Age Assistance.

The average age of female unemployed was uniformly lower than for males.

When compared with the age composition of population, the unemployed were overrepresented among the young and the old.

DEPENDENTS.

Only one-fifth of the totally unemployed and one-tenth of the emergency workers who reported on dependents, had no dependents.

The average number of dependents per registrant was much higher among men than among women for both groups.

One-third of the totally unemployed females and nearly one-fourth of the emergency worker females had no dependents.

Fourteen percent of the totally unemployed and twenty-four percent of the emergency workers had five or more dependents.

As would be expected, the number of dependents reported by the emergency worker group, both male and female, was higher than for the nonemergency worker unemployed.

OTHER WORKERS IN FAMILIES.

Thirty-eight percent of totally unemployed and fifty-four percent of emergency workers who reported under this classification showed no other workers in same household.

Many more women than men appear as secondary workers, in families with one or more other workers.

We realize that the value of our revelations depends somewhat upon their currency. With that in mind we have made every effort to speed the final report. The total number of tabulating operations necessary to completely analyze the replies to the 14 questions on over 11,000,000 cards, representing total and partial unemployment, exceeds 100,000,000 card units. We are making this partial report available 3 months after the taking of the census and we will shortly make available reports showing the break-down by States of all of the vital information.

Respectfully submitted.

John D. Biggers, Administrator.

SEMIFINAL REPORT ON THE COST OF THE UNEMPLOYMENT CENSUS

May 12, 1938.

The President,

The White House.

My Dear Mr. President: Practically all work in connection with the Unemployment Census is now completed and the final report is in the hands of the Government Printing Office.

The cost, including everything, will not exceed \$1,986,595.46 out of the \$5,000,000 authorized under Executive Order No. 7711 of September 22,

1937. A condensed summary of the cost is attached.¹ Unused balances will, of course, be returned to the Treasury.

Important savings were effected by utilizing the facilities of other Government agencies as authorized by the act of Congress and approved by you. All cooperated in a fine way. The Post Office Department and the Bureau of the Census performed particularly valuable services. Reimbursement for all such services has been made and included in the cost of the census.

The final report will be submitted to you shortly and made public. Seventeen hundred people worked three shifts a day to complete the 100,000,000 necessary tabulations in record time. Its 2,000 pages will include much information of value if promptly and effectively used. It will contain complete detailed tabulations for each State; each of the 3,070 counties; and each of the 982 cities having a population of 10,000 and over. Each State, county, and city can use this information as a valuable aid in solving its own unemployment problem.

Our organization is now substantially disbanded, the remaining staff being sufficient only to check the publication and distribution of final reports and the liquidation of accounts.

As I conclude my duties as Administrator, I again express to you my appreciation, and that of our staff, for your advice and support throughout this undertaking.

Respectfully submitted.

John D. Biggers, Administrator.

¹ COST OF THE UNEMPLOYMENT CENSUS

Expenses including final estimates:

Post Office Department.....	\$504,291.64
Bureau of the Census.....	920,663.52
Printing.....	315,015.71
Administration and field expenses.....	246,624.59
Total.....	<u>\$1,986,595.46</u>

Appendix A. SPECIAL INSTRUCTIONS TO POST OFFICE EMPLOYEES

Office of the Postmaster General Washington, D. C.

October 28, 1937.

COOPERATION WITH THE ADMINISTRATOR OF THE NATIONAL UNEMPLOYMENT CENSUS

POSTMASTERS AND ALL POSTAL EMPLOYEES ARE ENJOINED TO READ AND STUDY THE FOLLOWING INSTRUCTIONS RELATIVE TO COOPERATION WITH THE ADMINISTRATOR OF THE NATIONAL UNEMPLOYMENT CENSUS

1. The Post Office Department has agreed to cooperate with the Administrator in a registration of the unemployed and partly unemployed to be made during the period November 16 to 20, 1937, inclusive.

2. Postmasters and all postal employees should carefully study and comply with the following instructions to the end that this work undertaken by the Postal Service shall be conducted in a systematic and satisfactory manner. A printed informational pamphlet known as Form IP-1, which will assist postal employees in answering inquiries, will be issued by the Administrator. Postmasters will be supplied, without requisition, a sufficient number of Forms IP-1 to provide one for each postal employee and a reserve supply for use by local agencies assisting in the registration will be supplied the larger offices.

UNEMPLOYMENT REPORT CARDS

3. A printed form, the unemployment report card, which is referred to as the "URC" Form, will be used in securing the information. The Government Printing Office at Washington, D. C., will ship supplies of this form direct to all FIRST-CLASS and CENTRAL ACCOUNTING OFFICES. The central accounting offices will, in turn, make shipments of the forms to all SECOND-, THIRD-, and FOURTH-CLASS OFFICES. A sufficient number of the forms will be furnished to all offices for the delivery of one form to each dwelling with a reserve supply for distribution on request.

WHO SHOULD FILL OUT URC FORMS

4. This registration is intended for:

- (1) Persons who are totally unemployed, ABLE to work and want work, Questions 2(a) and 3, URC Form.
- (2) Persons who are partly employed and want MORE work, Question 2(b), URC Form.
- (3) Persons who are working on a WPA or any other emergency-work project supported by public funds, Question 2(c), URC Form.

Persons who do not fall into one of these three classes should NOT fill out URC Forms.

Workers at part-time or irregular jobs who are able to do more work and who want more work should fill out and mail the URC Form even though they have some employment.

Housewives and unpaid family workers engaged in domestic duties, and unpaid family workers helping in a family business, store, or on the family farm should NOT fill out URC Forms unless they are looking for other work for pay.

Full-time students at high school or college ordinarily will not fill out URC Forms even though they are seeking incidental employment. However, if they are receiving NYA student aid, or are looking for full-time work and expect to quit school when they find work, they should fill out and return URC Forms.

DELIVERY OF URC FORMS BY CITY AND VILLAGE CARRIERS

5. Unemployment report cards (URC Forms) shall be delivered to each dwelling, or place of abode, throughout the entire United States, including the Hawaiian Islands and Alaska, on Tuesday, November 16, 1937.

6. A supply of URC Forms shall be made available to all carriers prior to November 16, 1937, in ample time for them to arrange for their delivery on that date. This may be accomplished by delivering a supply to each carrier's desk, or placing them conveniently for the carriers.

7. Every city and village carrier shall deliver one URC Form to each dwelling, or place of abode, on his route on November 16, 1937. Such deliveries will be made to regular mail receptacles where provided. If he has reason to believe that there may be more than one person, who is unemployed or partly unemployed, residing at an address, he should supply forms accordingly. He shall also supply forms upon request.

8. It is the wish of the Department that the morning deliveries be not unduly delayed on this date resulting in inferior service to the public. Bearing this in mind, carriers shall arrange for a complete delivery of the URC Forms on their routes on November 16, 1937. If delivery of these forms is made to a certain part of the route on the morning trip EVERY dwelling on that part of the route must receive at least one form, and the carrier shall decide upon a definite ending point for subsequent delivery. All territory to which delivery was not made on the morning trip must be served on the afternoon trip, using overtime if necessary. Regardless of the method employed, complete delivery of at least one URC Form to each dwelling, or place of receipt of mail, must be made on Tuesday, November 16, 1937. Delivery of the URC Forms should not be made to places of business except upon request.

9. The following instructions cover distribution of URC Forms in special instances:

(a) At commercial and apartment hotels leave a supply of URC Forms in sufficient numbers for delivery to each permanent resident family or individual, and a supply sufficient in the opinion of the hotel clerk to provide for transient guests who may wish to register.

(b) At low-priced hotels or rooming houses, municipal lodging houses, missions, transient shelters, and types of lodging houses which provide accommodations principally for transients, leave a supply of forms in accordance with the number of families and individuals accommodated.

(c) URC Forms shall be delivered to all separate households at Army Posts, Navy Yards, etc., but shall not be left at barracks for enlisted men.

(d) URC Forms shall not be left for prisoners in penitentiaries, jails, or other penal institutions, but shall be left for the officials and employees of such institutions who regularly reside at such addresses.

(e) URC Forms shall not be left for patients at medical or surgical hospitals, homes for the aged or for the blind, mental hospitals, insane asylums, sanitariums, etc., but shall be left for officials and employees of such institutions who regularly reside at such addresses.

(f) At poorhouses, poor farms, workhouses, etc., URC Forms should be left for officials and employees residing at such addresses and for others if it is known that there are persons in residence there who want work and who are able to work.

(g) URC Forms shall be left for ALL workers who reside at construction camps established in connection with emergency projects operated by WPA, or by any other emergency work project supported by public funds.

10. During the entire period of the registration, November 16 to 20, all carriers shall have with them a sufficient number of URC Forms to supply anyone making requests. Carriers will, so far as practicable, courteously answer all questions asked of them concerning the preparation of the URC Forms. Wherever the carrier does not have the information, or good service does not allow time for such answers, the person should be politely referred to the nearest post office, station, or other known place for information.

DELIVERY OF URC FORMS BY RURAL- AND STAR-ROUTE CARRIERS

11. Every rural carrier, and every star-route carrier serving boxes on his route, shall deliver at least one URC Form for each family residing on his route. If he has reason to believe that there may be more than one person who is unemployed or partly unemployed residing at an address, he should supply forms accordingly. Ordinarily it will be sufficient to deliver one URC Form to each box. However, there will be many instances in which more than one family receives mail through a single box. In such cases, the rural- or star-route carrier should write the name of the head of each family on the President's message side of the form just above the words "To every worker."

12. For instructions covering distribution of URC Forms to transient lodgings, institutions, construction camps, etc., see paragraph 9.

13. During the entire period of the registration, all rural- and star-route carriers shall have with them a sufficient number of URC Forms to supply anyone requesting them. They will, so far as practicable, courteously answer all questions asked of them concerning the preparation of the forms. Wherever the carrier does not have the information, or good service does not allow time for such answers, the person should be politely referred to the nearest post office, station, or other known place for information. While attempt will be made to deliver forms to all dwellings, there may be a few too remote to reach. Rural- and star-route carriers will endeavor to contact persons from such communities adjacent to their routes who are willing to distribute such forms to neighbors and supply forms necessary. In such cases, it would be permissible to pass out forms in advance of November 16 if it would prove advantageous to do so.

DELIVERY OF URC FORMS AT THE GENERAL-DELIVERY WINDOW

14. One URC Form should be delivered to every caller at the general-delivery window on November 16, 1937, but after that date to and including November 20, 1937, only to such callers as request them. Clerks at the general-delivery windows should, so far as practicable, courteously answer all questions asked of them concerning the preparation of the URC Form. If they do not have the information, or if good service does not allow time to answer such questions, the person should be politely referred to some designated employee in the office or station for the necessary assistance.

DELIVERY OF URC FORMS TO POST-OFFICE LOCK BOXES

15. One URC Form shall be delivered to each post-office lock box rented by either individuals or firms on November 16, 1937.

DELIVERY OF URC FORMS TO DWELLINGS OUTSIDE OF DELIVERY LIMITS

16. Postmasters will arrange for delivery of URC Forms on November 16 to each house within any reasonable distance outside of delivery limits on the same basis as within city-delivery territory. Particular care should be exercised to cover trailer, tourist, and squatter camps. Postmasters are authorized to employ such substitute carriers as are needed to assist regular carriers to cover out-of-limit territory.

DELIVERY OF URC FORMS AT NONDELIVERY POST OFFICES

17. At nondelivery offices where the families are not reached through delivery by rural- or star-route carriers, postmasters are authorized to employ a competent person on November 16, if necessary, to deliver at least one URC Form to each dwelling or place of abode within a radius of approximately 1 mile of the post office. If the person making the delivery has reason to believe that there may be more than one person who is unemployed or partly unemployed residing at an address, he should supply forms accordingly. He shall also supply forms to anyone asking for them. This delivery shall also include trailer, tourist, and squatter camps. Payment for such service shall be made at the local prevailing rate, but not more than 50 cents per hour. Persons so employed should be required to familiarize themselves with the instructions in order that they may answer questions and assist the registrants. The general purpose of the instructions in paragraph 16 and this paragraph is that a URC Form be delivered to each household of your office only and not extended to patrons of other offices.

18. For instructions covering distribution of URC Forms to hotels, transient lodgings, institutions, construction camps, etc., see paragraph 9.

DELIVERY OF URC FORMS TO CCC CAMPS

19. Distribution of URC Forms to CCC camps will be made in bulk by corps area headquarters and district offices of the Civilian Conservation Corps directly to the commanding officers at these camps. Postmasters will not be required to furnish forms to CCC camps, as such distribution will be made direct by the Government Printing Office through corps areas. The forms after being completed will be mailed by the commanding officers to the postmaster at the office serving the residence address entered on the form. Upon receipt by the postmaster at the office of address, the forms will be handled by the checking section and carried through other steps of the procedure given in these instructions exactly as if they had been mailed in that city, except that the carrier will not be required to have personal knowledge of the individual. See paragraph 34(b).

RETURN OF COMPLETED URC FORMS

20. URC Forms may be returned by the registrant, either by dropping in a mail box, handing to carrier, or mailing in any post office, station, or branch. Forms so mailed during the period of registration should not be postmarked. Postage is not required on any mail matter used in connection with this Unemployment Registration, therefore no record need be made of such mails from a revenue standpoint.

21. While the registration dates are given as November 16 to 20, inclusive, it is realized that some postmasters, in order to register all of the patrons involved at their offices, may be required in certain instances to distribute some of the forms in advance of November 16 to persons who live in remote sections and who may not call at the post offices between November 16 and 20.

22. For various reasons all of the forms may not be returned by November 20, and forms subsequently received will be handled as follows: Forms received at delivery offices prior to the distribution to carriers on November 23, and at nondelivery offices prior to the closing hours on November 22, should be handled in the same manner as those previously received. If received subsequent to November 22 and 23, as outlined above, they will be postmarked as soon as received with the HAND POSTMARKING STAMP. (Do not use canceling machine.) After being postmarked these forms will be checked only for the purpose of inserting the city (town or village), county, or State, if omitted, and should be forwarded at the end of each day to the Administrator, National Unemployment Census, Washington, D. C.

PRELIMINARY REVIEW

23. As fast as forms are received from registrants, they shall be segregated into a unit to be known as a "Checking Section." These sections should be set up and in operation not later than November 17. As the forms are received in the checking section, they will be given to a group of employees for the purpose of checking the address (line 2 of question 1). If the city (town or village) shows the registrant's address to be a post office other than the checking office, the form will be immediately postmarked in the lower left-hand corner (money order, parcel post, or any stamp showing office and date may be used) and enclosed in an official penalty envelope. The envelope should be addressed to the postmaster at the office of address furnished by the registrant and in the lower left-hand corner should be written "URC Form" and the envelope mailed without delay. If a postmaster does not have official envelopes available, he will mark out the address "National Unemployment Census" and write on the address side of the URC Form the name of the post office to which it is to be forwarded. Under no circumstances should these forms be held, but they must be forwarded promptly. All such forms forwarded must be postmarked.

24. While eliminating the nonlocal forms the checker will check the local forms and supply the city (town or village), county, and State, if omitted. After this check has been completed the forms will be distributed throughout the checking section for further review in accordance with the detailed instructions that are to follow. Forms received from other offices will be immediately taken into the checking section on the same basis as forms mailed locally.

NOTE.—It is particularly important that the county and State shown on the form be the county and State of residence rather than the county and State in which the post office is located.

25. In the instructions to follow, it will be noted that clerks in the checking section may accept blanks where some questions are not answered. In other instances, clerks in the checking section may insert answers to questions, and in cases where certain specified questions are not answered, it will be necessary to contact the registrant. Where it is necessary to make further contact with the registrant, the person making the contact should see that all questions are answered. After the forms are once received into the custody of the postmaster they will not be released for any purpose except in two instances:

- (1) When they are mailed to the postmaster at the registrant's home city, and
- (2) When final disposition is made either to the Central Accounting Postmaster, or forwarded to the Administrator, National Unemployment Census, Washington, D. C.

NOTE.—The fact that certain questions may be accepted in blank is not to be interpreted to mean that answers to these questions are not desired, and registrants should be instructed to answer all of the questions and further instructed to enter but one check mark in answer to Question 2.

26. For the guidance of the checking unit in the operations to be completed after the preliminary check is made on line 2, the following detailed instructions are given:

Question No. 1, line 1.—At least one initial and the last name must be legibly shown either on line 1 or in the signature at the bottom of the form. Where name is not given in either place, the registrant should be contacted. Name will be accepted either printed or written with ink or pencil or typed.

The last question on line 1, "DO YOU LIVE ON A FARM", should be completed by the checker, if left blank, and the checker has the information. If a city address is shown, the answer would be "NO." If the checker has definite information of the residence of the registrant, he may insert "YES" or "NO", and in rural districts the rural carrier may be consulted if necessary. If the checker cannot fill in the answer to the question from the information of the street address, from the information furnished by the rural carrier, or from his personal knowledge, he should answer the question with the word "UNKNOWN." Consider as a farm anything that is locally regarded as a farm.

Question No. 1, line 2.—The city (town or village), county, and State should have been entered by the previous checker, but if it has not, it shall be entered by the second checker. (General Delivery or Box Number is a sufficient address.) If the street address is left blank, the form will be accepted if the registrant is known to the postmaster. If unknown to the postmaster, the form will be endorsed in the upper right-hand corner "UNKNOWN."

Question No. 2.—The registrant must be contacted when none of the three squares is checked. He must also be contacted if both squares "a" and "b" are checked or all three are checked.

Answers will be accepted where both "a" and "c", or "b" and "c" are checked. It is, of course, desired that only one check mark be made in answer to Question No. 2; therefore in every instance where it is necessary to contact the registrant, a correction should be made where more than one square has been checked.

Question No. 3.—The registrant must be contacted if this question is not answered.

Question No. 4.—The registrant must be contacted if this question is not answered. If the registrant does not know his exact age, he should give his approximate age. Where the form shows the year of birth, it will be accepted as submitted.

Question No. 5.—The form will be accepted as submitted, or in blank.

Questions Nos. 6, 7, and 8.—If all three questions are not answered, it indicates that the registrant failed to note the right-hand portion of the form and he should be contacted. Unless all three of these questions are unanswered, the following will prevail:

Question No. 6.—Will be accepted as submitted, or in blank.

Question No. 7.—Will be accepted as submitted, or in blank, except where the answer to 2(b) is checked; then if blank, the registrant shall be contacted.

Question No. 8.—Will be accepted as submitted, or in blank.

Questions Nos. 9, 10, 11, 12, 13, and 14.—The answers to these questions will be accepted as submitted, or in blank.

Signature.—The registrant should sign the form. However, if the signature line is blank and the necessary name information is given on Line No. 1, the form will be accepted. It is understood that where registrants cannot write it is permissible for them to have others complete their forms.

27. When it is necessary for the registrant to be contacted, endorse the word "contact" with colored pencil in the upper left-hand corner of the form over the words "It is important that." In such cases the checker will examine the entire form and make a colored pencil circle around the number of every unanswered question including Question 2, if not properly answered.

28. All forms sent out for additional information either by regular carriers or special contact employees must be returned to the checking section for final complete check. If the form is satisfactory or after November 22 shows an endorsement that the registrant could not be contacted, the checker will draw a line through the word "contact" in the upper margin of the form. As the forms are checked and found to be acceptable, they will be folded so that the addresses are readily visible to distributors.

CONTACT SERVICE

29. It will be necessary for all postmasters at delivery and nondelivery offices to arrange for a personal contact service in connection with the checking unit. Where there are but few persons to be contacted on a carrier route, it will be possible to distribute such forms to the carriers, who will make the contact necessary to complete the forms. Where the number of forms is such as would interfere with good postal service, then the contact should be made by specially trained personnel. Under no circumstances will the forms be released from the custody of the Postal Service, except that the form may be handed to the registrant to be completed in the presence of the postal employee. Whenever the registrant is contacted, an effort should be made to complete the answers to all questions on the form.

30. The person making contact should be thoroughly familiar with the form and have the ability to assist the registrant in completing it. It is possible that the contact person will not always find the registrant at home. In such instances attempts should be made to complete the information through the knowledge of members of the family. If the contact employee is unable to complete the form, arrangements should be made to contact the registrant at a subsequent time. The contact personnel must be sufficient in number to complete contacts on or before November 22 in nondelivery offices and before distribution to the carriers on November 23 at delivery offices. Regular carriers will keep incomplete forms in their custody for further attempt to contact the registrants, but in no instance will they retain the forms after November 22, when they are to be returned to the checking section. All contacts with registrants must be completed and the forms rechecked before the distribution of forms to the carriers on November 23.

31. When a form has been completed the contacting employee will endorse "completed" and his name on the side of the form bearing the address "National Unemployment Census" before returning it to the checking section. In the event the contacting employee cannot complete the form, and it is necessary for him to return it, he will endorse the date he called at the address given and reason for failure to secure the information.

NOTE.—It will be necessary for close supervision to be given forms on which the registrant must be contacted and to the personnel engaged in this work, in order that the information be completed before Nov. 22 at nondelivery and Nov. 23 at delivery offices.

DISTRIBUTION TO AND CHECK BY CARRIERS

32. Prior to November 16, postmasters at offices only where WPA workers reside will be furnished direct by local officials of the Works Progress Administration distinctive cards which will bear the name and address of all persons appearing on the rolls of that agency. Immediately after November 16 these cards will be distributed to carrier districts in accordance with the addresses shown and the carriers should be instructed to hold such cards for consideration in the check to be made on November 23. At nondelivery offices such cards will be held for a final check when the alphabetical check of forms is made.

33. As the URC Forms are checked in the checking section and found to be acceptable, they will be transferred to the city distributing section for distribution to the carriers. This will include forms mailed locally, and those received from other offices and CCC camps. Acceptable or completed forms should not be mixed with the forms that are given to carriers in order that they may contact the registrants for additional information. The carriers will hold such forms on their desks until after completion of their last mail delivery on Tuesday, November 23, when all forms will be cased as though intended for delivery.

34. After the URC Forms are distributed in the carrier's routing case, the carrier will make a check as follows:

(a) An examination will be made of each separation to determine whether there is more than one URC Form for the same name and address, and if so, one or more of them will be endorsed, "Duplicate" in the upper right-hand corner (above the words "Separate report card"), and all forms for the same person shall be fastened together with clips. Reasonable care should be exercised in determining that forms are in fact from the same individual. After the duplicates have been ascertained and clipped to the original, the carrier will then case all WPA cards with the URC Forms. The carrier will then check the URC Forms with the WPA cards to ascertain whether he has a URC Form for every person for whom he has a WPA card. Where it is ascertained that the carrier has a URC Form for the person named on a WPA card he will encircle with pencil the letters "WPA" in Question 2 (c). The "WPA" card should then be checked in the space provided indicating that a URC Form has or has not been received for the person listed on the card. After completion of this transaction the WPA cards will be withdrawn from the carrier cases and examined to see that all are checked and they will then be returned to the checking section in accordance with local office instructions.

(b) The carrier will then examine the name and address on all of the URC Forms in his case. If he has knowledge that he is delivering mail to the individuals shown on the URC Forms or that they reside at the addresses given, the forms will be considered completed and set aside. If the carrier has no knowledge that a registrant lives at the address given and the form does not show that it has been previously completed by some contact employee, he will allow the URC Form to remain as cased, and during delivery on the following day (November 24) he will make inquiry at the address given to determine if the person named on the form lives or has been living at that address. If he receives information that the registrant lives or has lived at the address given, such forms shall then be included with the other completed forms. The procedure outlined in this paragraph is not applicable to forms received from CCC camps, which forms will be overprinted in a manner that will make them distinctive from the general URC Forms. CCC camp forms will be cased and checked for duplicates the same as other forms, however, it will not be necessary for the carrier to have a personal knowledge as to the residence of CCC registrants.

(c) If it is ascertained upon inquiry that the person does not live or has not lived at the address given, the carrier should endorse the form in the upper right-hand corner (above the words "Separate Report Card"), "Unknown at Address Given." Forms so endorsed should be kept separate and not mixed with the accepted forms, and all forms will be returned to the checking section in accordance with local office instructions. This check is for the purpose of eliminating fictitious registrations and care should be taken not to exclude legitimate forms of transients. The necessary overtime for regular carriers to make contacts and checks on addresses is authorized.

35. The checking process as outlined under the preceding paragraph No. 34 will be applicable to both rural and star-route carriers, except that in nondelivery offices the transactions must be completed before the close of business November 22.

36. At delivery offices, registrants giving general delivery or out-of-limit territory addresses and registrants at non-delivery offices should be contacted, when necessary, the same as in delivery territory. When all forms are completed that can be completed they should be arranged in alphabetical order by surnames. After the forms are so arranged they will be checked for duplicates and all duplicates attached to the original in accordance with paragraph 34 (a). In out-of-limit territory postmasters will not make a further check to determine whether the registrant lives at the address given, unless he has reason to believe such check advisable. However, at nondelivery offices the postmaster should check the name of each registrant and where such registrant is unknown to him he should make every effort to ascertain if the person is known in the community. If the registrant is unknown the form will be endorsed "UNKNOWN" in the upper right-hand corner and placed with the questionable forms. WPA cards may be furnished at nondelivery offices and also for territory outside delivery limits. Where such WPA cards are received they will be arranged in alphabetical order and suitable endorsements made in accordance with paragraph 34(a) under the instructions to carriers.

NOTE.—Postal employees will not under any circumstances destroy duplicates or apparent fictitious forms.

FURTHER CONTACT ON WPA CARDS

37. After the WPA cards are returned to the checking section they will be examined to see that a check is made in one of the two squares on the card showing that a URC Form was or was not received. If it is found that no check mark is on these cards they will be returned to the carrier for endorsement from memory, if possible. All WPA cards checked to show that a URC Form has been received will be separated into counties and disposed of in accordance with the instructions in paragraph 47. All WPA cards checked to show that a URC Form has not been received from the person will be given further consideration as follows: A contact employee will visit the address shown on the card and make a courteous inquiry as to the failure to receive a URC Form. It is not intended that any forms be filled out at this time as the registration will be closed and the only purpose of the visit is to ascertain why a form was not filled out. Any answer or explanation made by either the individual or a member of his family will be accepted without question and so endorsed in the space provided on the card. If the person has removed or is unknown at the address given the card will be so endorsed. Not more than one attempt will be made to secure this information. If it is not obtained on the first visit the card will be endorsed to show the reason such information could not be obtained. After being endorsed the cards should be returned to the checking section.

SORTING AND TABULATION

38. After the checking of the forms is completed and proper endorsements made the forms will be sent to the checking section for sorting and counting. Offices serving more than one county will first separate forms for EACH county and all further sorting and tabulation will be done SEPARATELY for EACH COUNTY.

39. Duplicate forms will have been clipped together with the original by the carriers and will remain clipped together throughout the entire tabulating process. A count of such duplicates will first be obtained by counting only the EXTRA forms in every instance where two or more forms are clipped together. In all succeeding counts, duplicate forms clipped together with original shall be counted as one form.

40. After arrangement by COUNTIES the forms will be separated into two groups (the COUNTIES being kept separate) as follows:

Group (1)—Questionable forms.—These will include:

Forms endorsed in the upper right-hand corner of the form with "Unknown at Address Given"; "No such Address", etc.

Forms on which no answer is given to Question 2.

Group (2)—Acceptable forms.—These will include:

All forms not included in Group 1.

41. Postmasters at nondelivery offices of the second, third, and fourth class shall mail the URC Forms and WPA cards and their reports not later than the close of business on *Monday, November 22*. In transmitting the forms and cards to the central accounting postmasters they shall be kept separate by counties, and on top of the forms and cards for each county will be placed a form letter TAB-8 to the central accounting postmaster as follows:

Central Accounting Postmaster:

Attached herewith are URC Forms and WPA cards;

----- County ----- State.

----- Questionable URC Forms Group 1.
(Number)

----- Acceptable URC Forms Group 2.
(Number)

----- Duplicate URC Forms.
(Number)

----- WPA cards.
(Number)

NOTE.—The two groups of URC Forms and WPA cards shall be tied separately.

42. At all delivery offices the instructions as to the separation of the cards and forms and tabulation set forth above will be followed; however, a different method as to reporting and disposition of the forms and cards will be used by all first-class offices.

43. At delivery offices of the second and third class, it is believed that postmasters will be in a position to submit their reports to the central accounting postmasters with the close of business November 24. They should prepare a report for each county as indicated above to the central accounting postmaster at the close of business November 24, and the cards and forms should be mailed to the central accounting postmaster at that time or not later than the following day. A tabulation of each county on Form TAB-8 shall be attached to the cards and forms for each county when mailed to the Central Accounting Postmaster.

44. At offices of the first class, postmasters shall make a separation and tabulation in accordance with the instructions set forth under nondelivery offices. This tabulation should be started as soon as any forms are available and shall be completed at the earliest time possible after November 24. It must be completed no later than the close of business, November 26. On the night of November 26 (or before, if possible), a letter shall be sent to the First Assistant, Division of Post Office Service, reporting the number of forms and cards by counties, as shown in each item on Form TAB-8.

45. At central accounting offices, postmasters shall submit reports for their local office not later than November 26, the same as other first-class offices. They will prepare in advance suitable checking lists by offices and forms for tabulation by counties in order that the reports from district offices may be tabulated as soon as received. Where Form TAB-8 has been submitted by a district office (including second-class offices) the figures to be tabulated may be taken from the Form TAB-8 and the forms and cards need not be verified. Postmasters at nondelivery offices whose reports have not been received by November 25, shall be directed by telegram to forward the missing reports immediately. Postmasters at delivery offices of the second and third class whose reports are not received by November 26, shall be directed by telegram to submit their reports immediately. On November 27, central accounting postmasters will report to the First Assistant, Division of Post Office Service, the results of the consolidated tabulation for all second-, third-, and fourth-class offices. This report should be submitted on Form TAB-8, using one form for each county. In the letter transmitting the Forms TAB-8 for each county he should advise the number of delinquent offices by classes. Forms TAB-8 from district and second-class post offices shall be filed at the central accounting office.

46. A letter should be sent to the Post Office Inspector in Charge on November 27, listing the delinquent offices. As soon as all reports are in and tabulated another report will be made to the First Assistant, Division of Post Office Service, advising that all second-, third-, and fourth-class offices have reported and giving the corrected totals for each county, by States, within their districts.

DISPOSITION OF URC FORMS AND WPA CARDS

47. Postmasters at second-, third-, and fourth-class offices will forward URC Forms and WPA cards to the central accounting postmaster, with Form TAB-8 for each county. First-class offices including cities at which central accounting offices are located shall as soon as practicable after November 26, forward all URC Forms and WPA cards to the Administrator, National Unemployment Census, Washington, D. C. URC Forms and WPA cards shall be separated in accordance with the instructions on the Form TAB-8. Central accounting postmasters shall consolidate all URC Forms and WPA cards received from second-, third-, and fourth-class offices, the two groups of URC Forms and WPA cards being kept separate by counties. Immediately after November 27, the URC Forms and WPA cards tabulated in the report of November 27, will be forwarded to the Administrator, National Unemployment Census, Washington, D. C., the two groups of URC Forms and the WPA cards being tied separately by counties. A consolidated Form TAB-8 will be enclosed with forms and cards with each county. When all offices have reported and the corrected report submitted to the Department the URC Forms and WPA cards received subsequent to November 27 will be promptly forwarded to the Administrator. While the final report to the Department will be a corrected total report on Forms TAB-8 for each county, the Form TAB-8 enclosed with the URC Forms and WPA cards will only show the total of the cards enclosed. The packages containing forms and cards addressed to the Administrator will be endorsed in the lower left-hand corner "URC Forms for _____ County _____ State." The package that contains copies of the tabulated report for the county should bear a further endorsement "Tabulated Report Enclosed." All such mailings should be wrapped and tied in such manner as will prevent the packages from breaking in transit.

Postmasters and all employees must understand that the results of these tabulations should not be made known to any person other than provided for in the above instructions; that is, the central accounting postmasters, the Post Office Department, and the Administrator of the National Unemployment Census. Further, postmasters or postal employees will not make known to anyone the answers given by registrants on the individual cards. These instructions do not provide for any separation of acceptable forms and separation of such forms to show the unemployed, partly unemployed, or other information shall not be made.

PUBLICITY

48. Under date of October 6, 1937, the Administrator mailed a letter to all mayors in cities of 2,500 or more population, asking them to appoint a committee of representative persons in the community who will assist generally with the publicity, or in any other manner needed, to make this registration a success. These mayors were asked to appoint postmasters as members ex-officio of the committee. Postmasters will make use of such available assistance as they may consider necessary. Cooperation with outside agencies will be limited to the mayor's committee, and the procedures followed must be within the scope of these instructions.

49. Posters 20" x 30" will be received by the postmasters in towns of 2,500 population and up direct from the manufacturer. Shipments will begin on October 26 and distribution will be completed in about 10 days. The packages will be addressed to the postmaster and marked for the immediate attention of the Mayor's Committee on the National Unemployment Census. The postmaster should withdraw a sufficient number of posters so that at least two may be displayed in post offices, stations and branches, and other Government buildings in his community. The postmaster should then notify the chairman of the mayor's committee of the arrival of the posters and turn the remainder over to him for distribution throughout the community. In the case of towns under 2,500 population two posters will be sent to each postmaster for display in his post office.

50. Window cards 13" x 15" will be received direct from the manufacturer by all delivery offices sufficient in number to permit distribution of one card to every "food store", "general merchandise store", "general store", and "drug store" on all regular mail delivery routes, and two or more for display in post offices, stations, and branches. Shipments will begin about October 25 and the window cards will be in the hands of all postmasters not later than November 5. All nondelivery offices will receive two of these window cards which are to be displayed by the postmaster in a prominent place in the post office between the dates of November 16 and November 20, inclusive. Delivery of window cards is to be made by the letter carriers on Tuesday and Wednesday, November 9 and 10.

51. Postmasters will arrange for such available publicity as they believe would be advantageous in their respective communities with the understanding that all such publicity will be without cost. This publicity may be in the form of radio broadcasts, newspaper publicity, or other means available. There will be sufficient printed information on URC Forms and informational pamphlets to eliminate the necessity of any postmaster circularizing local mimeographed letters of information.

52. The local publicity should include the information that the URC Forms will be distributed to every household on November 16; that additional copies may be obtained upon request at any post office or station or other known place of information; and it should specify the location of post-office stations or other places of information where the individual may call and obtain assistance in completing the answers to the questions on the form. It should further inform that the completed URC Forms may be returned by dropping them in any mail box, post office, or station and that no postage is required.

53. The publicity should also urge that all questions on the forms be answered and stress should be laid on the fact that the forms should be mailed not later than November 20. The widest publicity possible should be given to the fact that the registrants in answering line 2 of Question 1 should show the county and State of residence and not the county and State in which their post office is located. The street address should be the residence address. Postmasters shall use their discretion as to what other information is necessary, but particular care should be given that misinformation is not publicized and that the information given is in accordance with these instructions and the information contained in Form IP-1.

EXPENDITURES

54. It is the wish of the Department that our cooperation with the Administrator in this registration be handled at a minimum expense using the present personnel insofar as practicable. All expenses incident to this work will be paid from the post-office revenues and reports thereof made as hereinafter explained. Where the work is performed by a regular employee and no substitute is used to replace that employee while engaged in this work, there will be no expenditure involved. Where a substitute employee is used in lieu of the regular employee engaged on this special work, the pay of the substitute will be considered the expenditure made. In addition to replacement expenditures, the entire cost of all substitutes engaged in registration work will be charged, as will the overtime put in by regular employees while engaged in work in connection with this registration. Night differential should also be included.

55. Under the law, village, rural, and star-route carriers cannot be paid for any overtime used in connection with this work. It is not contemplated that the additional work involved with these employees will be sufficient as to work an undue hardship on any individual. However, there may be instances in connection with the village delivery service where it would work a decided hardship on the carrier to perform all of the duties set forth in these instructions. In such instances postmasters are authorized to use the substitute village carrier to the extent necessary and such substitute time should be reported with other expenditures of Form SR-6.

56. There may also be instances where the contacts to be made by rural or star-route carriers will be in such numbers that they will interfere with good postal service and in these instances the substitute rural carrier or other person may be employed. The rate of pay will be the same as for other temporary employees at nondelivery offices, not to exceed 50 cents per hour, plus 5 cents per mile for vehicle. Report of such expenditures shall be made on Form SR-7.

NOTE.—It must be understood that star-route carriers are under contract. Any contact service performed by them will be voluntary, as they are not required to perform such service under their contract. They are, however, urged to cooperate in every way practicable.

57. All central accounting postmasters will make a report to the First Assistant, Division of Post Office Service, SR Section, at the close of business October 31, 1937, as to the total cost of overtime and auxiliary service chargeable to this registration used during the month of October. All postmasters at first- and second-class post offices (including central accounting offices) and postmasters at third-class post offices having village delivery service will make a similar report at the close of business, November 30, 1937. All postmasters mentioned above should submit a report whether or not additional expenditures are involved. If no additional expenditures are involved, the report should so state. This report will be submitted on Form SR-6 which will be furnished by the Department without requisition.

58. It is not anticipated that any additional expenditures will be involved in third- and fourth-class post offices relative to the clerical work necessary in connection with this registration. However, in any instance where the postmaster believes that the additional work involved by this registration places an unreasonable burden on the clerical force a report should be made to the First Assistant, Division of Post Office Service, setting forth the conditions and time involved, and consideration will be given to authorizing additional clerical allowances in such instances.

59. Paragraph 17 provides for a house-to-house delivery at all nondelivery offices, which may require additional expenditures. Paragraph 56 provides for assistance on rural and star routes in specific instances which will require additional expenditures. Such expenditures should be reported not later than November 30 to the First Assistant, Division of Post Office Service, SR Section, and an allowance will be issued. The report from nondelivery offices should be submitted on Form SR-7, which will be furnished without request.

NOTE.—No vehicle allowance will be authorized, except where needed on rural or star routes. Where additional street-car fares are necessary, such fares are authorized, and the amount used should be included in the report on Form SR-6.

ADDITIONAL PERSONNEL NEEDED

60. At all post offices of the first and second class and at third-class offices having delivery service, any additional personnel necessary must be selected from the Civil Service eligible list, provided a list is available. If no list is available, then additional employees may be employed in accordance with paragraph 74, page 81 of the current Postal Guide. The necessary additional personnel need not be bonded provided they are to be used exclusively in connection with this registration. At third- and fourth-class offices not having delivery service, the postmasters should, where additional assistance is necessary, select COMPETENT persons to make the distribution of the forms and further contacts necessary.

RENTAL OF OUTSIDE QUARTERS

61. Postmasters should arrange in all post offices, stations, and branches sufficient organization to assist registrants in completing the URC Forms. By reason of the short duration of this census, it is not believed that any general renting of outside facilities will be necessary. However, in some areas in large cities where there are a number of lodging houses and transient places or a large foreign population it may be advisable to obtain outside quarters where such persons may call advantageously for the assistance necessary. If such quarters are believed to be necessary it is possible that they may be obtained in local municipal buildings, such as schools, armories, etc. If rented outside quarters are believed necessary, authorization for the rental of such quarters must be obtained in advance. It is expected that the problem of registering the foreign population will be a serious one in connection with this Census; therefore postmasters must arrange in foreign-speaking communities for interpreters to render all the assistance necessary.

CORRESPONDENCE

62. It is believed that these instructions, together with the Pamphlet of Information, Form IP-1, are sufficient in detail to eliminate much correspondence, if the instructions and the pamphlet are thoroughly read. However, if any subject is not thoroughly understood by a postmaster at any first-, second-, third-, or fourth-class post office, correspondence should be had with the central accounting postmaster in order that the point at issue might be explained.

63. Attention is invited to the short period of time covering this registration. By reason of the time limit, it is very necessary that all postmasters make a close study of the instructions and the informational pamphlet, Form IP-1, as soon as they are received in order that the inquiry may be answered by the central accounting postmaster before the registration dates. Central accounting postmasters will arrange for sufficient personnel to promptly answer all communications as received.

64. Central accounting postmasters requiring information on subjects not covered by the instructions will write to the First Assistant, Division of Post Office Service, if time permits; if not, by telegraph, night letter, collect at the Government rate. Except during the closing dates covering the period of the Census, correspondence should be in letter form, and telegrams will be used ONLY where the time element demands their use.

SUPPLIES

65. *URC Forms* will be furnished all first-class offices direct from the Government Printing Office, and they will be furnished all second-, third-, and fourth-class offices through the central accounting office for the district. The supply of these forms will reach every post office before November 5. If not received by that date, the central accounting postmaster should be advised. Immediately upon receipt of these instructions and the cooperation to be given by the Post Office Department is understood, postmasters shall make a check of the number of forms received to determine whether they have a sufficient supply for their needs. If the supply on hand is insufficient, additional forms will be ordered by all offices, *including first-class offices*, from their respective central accounting postmasters. Postmasters shall keep a close check on the forms available in order that there will not be a shortage of forms at any post office. If there is a danger of a shortage occurring at any time during the registration, telegrams shall be sent collect to the *central accounting postmaster* for the additional forms needed.

66. Any office having an apparent excess of forms which they know will not be needed shall forward such forms to the central accounting postmaster as soon as the excess number is determined. Central accounting postmasters shall keep a close check of forms on hand and telegraph the First Assistant, Division of Post Office Service, if a shortage is anticipated.

67. *Post Office Department instructions*.—The instructions dated October 28 relative to cooperation with the Administrator of the National Unemployment Census will be furnished in sufficient numbers to all post offices for the issuance of one to each employee. These instructions will be mailed to all post offices direct by the Government Printing Office.

68. *Informational pamphlets, Forms IP-1*, will be furnished in sufficient numbers to all post offices for the issuance of one to each employee, and will be mailed to all post offices direct by the Government Printing Office. An additional supply of Forms IP-1 will be furnished the larger offices to permit a limited supply to local agencies assisting in the registration.

69. *Forms SR-6*, the monthly report of expenditures at first- and second-class post offices and third-class offices having delivery service, and *Forms SR-7*, for reporting expenses at third- and fourth-class offices, will be mailed direct by the Government Printing Office.

70. *Forms TAB-8*, for reporting tabulation by counties, will also be mailed direct by the Government Printing Office.

71. *General use of post-office supplies*.—It is not believed that any excessive use of post-office supplies in connection with this registration will be made at second-, third-, and fourth-class offices. At first-class offices a record should be made of paper, pencils, twine, clips, and other supplies used in connection with this registration and a report made to the Fourth Assistant, Division of Building Operations and Supplies, Equipment and Supplies Branch, of the amount used immediately following the close of the registration.

72. I desire to impress upon postmasters and all postal employees who will be concerned in handling this work the importance of giving the matter careful advance thought and consideration and of effecting such arrangements as will result in this exceptional task being performed in a manner which will reflect credit on the Postal Service.

Postmaster General.

Appendix B. INFORMATIONAL PAMPHLET

SECTION I

WHAT IS THE CENSUS?

1. Plan of the National Unemployment Census.

At the direction of the Congress, the President has approved a plan for a census of all unemployed and partly unemployed workers. All persons at work on emergency work projects of the Government are also included in this census.

The number of the unemployed will be determined from information secured by a voluntary individual registration. A card to be filled in and returned to the post office will be delivered to every dwelling on November 16, 1937. These cards will then be forwarded by the post office to the National Unemployment Census. Completed cards must be mailed before midnight, November 20, 1937. No postage stamps are needed.

The form of the registration card to be used in this census was determined by a statutory committee composed of Cabinet members and heads of the Federal agencies most directly concerned with the problems of unemployment.

The census will be taken under the direction of John D. Biggers, Administrator. In order to secure a maximum of efficiency at a minimum cost, the existing facilities of the Federal Government will be utilized wherever possible. The Post Office Department will distribute the cards, and furnish helpful information to registrants. Tabulations determined by the National Unemployment Census Administrator will be made by the Bureau of the Census of the Department of Commerce. A committee of experts appointed by the Central Statistical Board, Washington, D. C., will advise the Administrator on the many technical problems which will arise in this census.

2. Mayors' Unemployment Census Committees.

In 16,000 cities and towns the mayors have been asked to form citizens' committees, representative of the varied interests of the community, to collaborate with the postmaster and give whatever assistance is necessary to assure a complete and accurate registration of the unemployed. This will be accomplished by providing publicity, furnishing speakers, the creation of special committees to deal with certain phases of the problem, and otherwise to provide a complete educational service. Unemployment is a major community problem, and it is felt that the information derived from this census will be of value in its solution.

3. The Unemployment Report Card.

The card to be used in this census, shown on page 8, lists 14 questions about each individual who registers. Each question is fundamental for an understanding of the problem of unemployment. The President has said in his message to every worker: "It is important to the unemployed and to everyone in this land that the census be complete, honest, and accurate."

To a large extent the card is self-explanatory, and in most instances it will be filled in by the individual without assistance. However, this pamphlet will assist you to provide more complete information about the census and the questions on the report card.

Cards will be distributed by postal employees to dwellings throughout the United States, the District of Columbia, and the Territories of Hawaii and Alaska. Only one card will be left at each dwelling unless the carrier has reason to believe that there are two or more unemployed workers. Additional cards will be available at any post office or can be obtained upon request from any carrier. All post-office employees will endeavor to answer inquiries concerning the census and the report card and will, upon request, give assistance in filling out the report card or refer the person making the inquiry to the nearest post office.

The confidential nature of the answers to questions on the Unemployment Report Card will be respected by the Administrator of the National Unemployment Census. The names of signers will not be published or made public in any manner.

4. Advantages of Registering.

The President has stated in his message to every worker: "If you give me the facts, I shall try to use them for the benefit of all who need and want work and do not now have it." Registration on the Unemployment Report Card is in no sense registration for a job. Individual jobs will not be provided in this way. The Congress directed that the census be taken to provide information " * * * to aid in the formulation of a program for reemployment, social security, and unemployment relief for the people of the United States, * * *."

SECTION II

WHO SHOULD REGISTER?

5. Individual Registration.

Each person in every family should fill out and return an individual Unemployment Report Card to the post office if he is included in any of the groups described in the following paragraph entitled, "Persons Who Should Register." An adequate supply of cards should be made available upon request, in order to assure the inclusion in the census of each person who should register.

6. Persons Who Should Register.

a. All persons who are totally unemployed, *able* to work, and *want* work. Included in this group are the following:

- (1) Persons who have worked for pay, who are *able* to work, and still *want* work.
- (2) Persons who formerly had their own business, farm, or professional practice, and no longer work at it, who are *able* to work, and *want* work.
- (3) Persons now looking for their first jobs.

b. All persons who are partly employed, *able* to do more work, and *want* *more* work. Included in this group are the following:

- (1) Persons working part-time at regular jobs, who are *able* to do more work, and *want* *more* work.
- (2) Persons employed part time on irregular work (including casual workers) who are *able* to do more work, and *want* *more* work.

c. All persons working full time or part time on projects of WPA, NYA, CCC, or other emergency work projects which are supported by public funds. Included in this group are the following:

- (1) Persons working on Works Progress Administration projects or on emergency projects of other Federal agencies under the Works Program.
- (2) Enrollees working in CCC camps.
- (3) Persons employed on NYA work projects.
- (4) Persons receiving NYA student aid.
- (5) Persons working on emergency work projects conducted by State or local governments as part of a work relief program.

7. Persons Who Should NOT Register.

a. The following groups of employed persons should NOT fill out and return Unemployment Report Cards:

- (1) Persons who are working full time for wages or commissions, or persons who devote full time to their own business, farm, or professional practice. Note that some of these workers may be looking for another job, but they should not register.
- (2) Persons who are working part time (except on emergency work projects which are supported by public funds) and who do *not* want more work.
- (3) Persons who are on strike unless actively seeking another job.
- (4) Persons who are temporarily sick or disabled but have a full time job to which they will return as soon as they get well.
- (5) Persons who are on vacation or are taking time off from a job to which they will return.
- (6) Administrative employees of WPA, NYA, CCC, or other agencies which are conducting emergency work projects which are supported by public funds.

b. Other groups specifically excluded from registration are:

- (1) Persons who are unable to work because of permanent disability or chronic illness.
- (2) Persons who have retired or who do not want work.
- (3) Young persons excluded from work because of State child labor laws or local ordinances.

8. Special Groups.

Paragraphs 6 and 7 list the general definitions covering those who should and those who should not fill out and return the Unemployment Report Card. There are, however, certain groups of persons regarding which questions will arise frequently:

Housewives engaged in domestic duties, or helping in a family business, store, or on the family farm should *not* fill out cards unless they are able to do other work and are looking for work for pay. Note that some housewives are regularly employed for pay or profit either part time or full time, and that these women should follow the instructions for other full-time and part-time workers.

Unpaid family workers (that is, persons whose work is in the home, the family store, on the family farm, etc., without pay) who formerly had a paid job, or who are looking for a first job, should fill out the card if they are able to work and want a job for pay. However, unpaid family workers who expect to continue at their present work should not fill out the card.

Full-time students at high school or college ordinarily will not fill out cards even though they are seeking incidental employment. However, if they are receiving NYA student aid or are looking for full-time work and expect to quit school when they find work they should fill out and return cards.

Inmates of institutions, such as penitentiaries, jails, hospitals, homes for the aged, insane asylums, etc., should not fill out Unemployment Report Cards, and no cards will be left by the post office for their use. Persons other than inmates in such institutions are eligible to register if they can qualify in the groups mentioned in paragraph 6 above. Inmates at poorhouses, poor farms, etc., who are receiving institutional care in place of home or work relief and who are *able* to work and *want* work, should fill out and return Unemployment Report Cards.

SECTION III HOW TO REGISTER

Question 1. Name, Address, and Farm Residence.

The name should be printed clearly and distinctly. Give the first name, middle name or initial, and last name.

The address given should be the one at which the registrant lives or the one he considers as his usual residence. A person temporarily away from home should give his or her *home* address. "General delivery" or "P. O. Box (number)" are not satisfactory entries for the registrant's address. Abbreviations should not be used.

It is important that the name of the county be filled in correctly even though it is not ordinarily given as a part of the address. *The county given should be the county in which the worker actually lives. This may not be the same as the county in which his post office is located.*

Do you live on a farm? Enter "Yes" or "No". Any tract of land locally so regarded should be considered a farm. The answer should be "Yes" only if the person is living on a farm at the time of registration.

Question 2. Are you: (a) Totally unemployed and want work? (b) Partly employed and want more work? (c) Working at WPA, NYA, CCC, or other emergency work?

Check only one item. The check should show which of the three statements, "a", "b", or "c" describes the employment status of the registrant at the time the card is filled out. If the worker is totally unemployed, is able to work, and wants work, he should check "(a)"; if he is partly unemployed, is able to do more work, and wants more work, he should check "(b)"; if he is employed on a WPA or other emergency work project which is supported by public funds, he should check "(c)". Workers who check "2 (c)" should not check either "a" or "b". Temporary employment in private business or industry is not "emergency work." (For a discussion of "Who Should Register" and "Who Should Not Register", and "Special Groups" see Sec. II.)

Question 3. Are you able to work?

Workers who return a report card should be able to work and should check "Yes." (See "Who Should Register", Par. 6, Sec. II.)

Question 4. Age at last birthday.

Enter age in years. If the exact age is not known, the approximate age should be given.

Question 5. Color or race.

Check either "White", "Negro", or "Other." Persons of Mexican parentage should check "White." Indians, Chinese, Japanese, and others who are not white or Negro, should check "Other."

Question 7. How many hours did you work last week?

Enter number of hours. The figure entered here should be the total number of hours worked for pay or profit during the week from Sunday, November 7, through Saturday, November 13.

All time worked at odd jobs or in return for compensation other than cash (for example, janitor service in return for free rent) should be included. If the person did not work during this week, the entry should be "None."

Hours worked on WPA, NYA, or other emergency work projects which are supported by public funds should not be included. Hours worked by unpaid family workers, including housewives, in family business or on the family farm, etc., should not be counted.

Question 8. How many weeks did you work in the last 12 months?

Enter number of weeks. This entry should show the total number of weeks in which the person did any work for pay or profit during the 12 months from November 1, 1936, through October, 1937. The number of weeks worked on a WPA, NYA, or other emergency work project which is supported by public funds or in a CCC camp, should not be included. If the exact number of weeks worked is not known, approximate figures will be acceptable. Example: If the person worked at some time during each week of the past year, the entry should be "52." If he worked for the past 6 weeks full time and had no previous employment during the year covered, the entry should be "6."

Question 9. What is your occupation, or kind of work?

The registrant should look at question 10, "Kind of business or industry in which you did, or are doing, this kind of work?", before answering this question. The specific kind of work the person usually does should be entered in question 9 and the type of establishment, business, or industry in which the work is done should be entered in question 10.

Thus, for example, if the person has been a filing clerk in the office of a department store the answer to question 9 should be "filing clerk" and the answer to question 10 should be "department store." Care should be taken to avoid general descriptions such as "clerk", "engineer", etc. Use instead such terms as "sales-lady", "filing clerk", "typist", "stationary engineer", "civil engineer", etc. The term "laborer" should be avoided if it is at all possible to indicate the specific type of work done, such as "ditch digger", "lumber stacker", "stevedore", etc. The term "mechanic" should also be avoided if more specific designation is possible such as "carpenter", "electrician", "auto repair man", etc.

If the registrant has never had a steady job other than at emergency employment such as on WPA, NYA, CCC, etc., he should enter "new worker" in both 9 and 10.

Entries of "None", "Unemployed", etc., are not acceptable. If the registrant is not working now, he should give the kind of work he usually does when he has a job. If he is partly unemployed and wants more work, he should enter the kind of work he usually does.

A woman who has done only housework in her own home and registers because she is now seeking other work should enter "new worker." A woman who usually does housework for wages and registers as totally or partly unemployed should enter an occupation such as "servant", "cook", or "chambermaid", and the entry

in question 10 should state the kind of place in which she worked, such as "private family", "hotel", "boarding house", etc.

Question 10. Kind of business or industry in which you did, or are doing, this kind of work?

This question is so closely related to question 9 that the two should be considered together. This question calls for the kind of establishment or business or industry in which this person works, as "cotton mill", "coal mine", "grocery store", "bank", etc. The name of the employer should not be given as an answer to this question.

In answering this question, the word "company" should be avoided wherever possible and should never be used without additional description. An oil company, for example, may operate oil wells, or a pipe line, or an oil refinery, or a cottonseed mill, or it may be engaged in selling oil. In such a case the terms "oil refinery", "oil wells", "pipe line", etc., should be used, and not the term "oil company."

If the registrant was in business for himself while engaged in the occupation given in question 9, he should enter the kind of business and "own shop", "own business", or "self-employed."

Question 11. How many other workers are there in your family living in the same household with you?

The registrant should enter the number of *all workers, except himself*, in his family who are working for pay or profit, or who are able to work and want work. Lodgers, boarders, servants, and others not related to the head of the family in which they live should answer "None" to this question and to question 12.

Question 12. How many of these workers are:
(a) *Totally unemployed and want work?* (b) *Partly employed and want more work?* (c) *Working at WPA, NYA, CCC, or other emergency work?*

This question refers to those workers reported in answer to question 11 who are unemployed or partly unemployed. In answering question 12 the registrant should enter under "(a)" all those in his family, except himself, who have no employment but who are able to work and want work; under "(b)", all those in his family except himself, who are employed part time only, are able to do more work, and who want more work; and under "(c)", all those in his family, except himself, who are employed on a WPA, NYA, CCC, or other emergency work project which is supported by public funds.

Question 13. How many persons are mainly dependent on you for support?

The registrant should include all persons who are mainly dependent on him for their support; such as young children, elderly parents without other means of support, etc. Such persons need not be living in the same household as the person registering. The registrant should not include himself as a "dependent."

Question 14. What was your individual total income, cash and other, last week?

The income reported in answer to this question should be that of the registrant and not the income of the family. It should be his (or her) income during the week from Sunday, November 7, through Saturday, November 13. If payments of wages, rent, interest, or pensions are received on a monthly basis, include one-fourth of the amount of such payments in the total. If such payments are received on a semimonthly basis, include one-half of the amount of such payments in the total.

Include all money earned, all gifts received, or money contributed by relatives or others; pensions, retirement benefits, and annuities received from former employers, insurance companies, or fraternal insurance funds; rents and interest received, and any other income from property. Wages should be for hours entered in question 7, page 12.

Include the estimated value of noncash income, such as goods received as gifts, produce from own farm or garden consumed during the week, value of board or room furnished free by others, whether or not in return for services rendered.

Do not include earnings on WPA, NYA, or other emergency work projects which are supported from public funds.

Do not include relief in cash or kind from public or private relief agencies or old-age assistance, aid to dependent children, or other similar aid from State or local governments.

Do not include unusual payments, such as from sale of year's crop, from sale of property, or from lump-sum insurance payments.

**A MESSAGE TO POSTAL EMPLOYEES,
MAYORS' COMMITTEE MEMBERS,
AND OTHERS COOPERATING IN THE
NATIONAL UNEMPLOYMENT CENSUS**

The President has approved plans for taking a national census of the unemployed and the partly unemployed. As Administrator, I am going to need your help, and I appeal for your support.

This is a very big job, and to be really valuable this voluntary registration of the unemployed must be honest and as nearly complete and accurate as is humanly possible.

The success of this undertaking will depend to a great extent upon the postal employees who will give the report cards and helpful information to those who wish to register. It is hoped that the following pages will make the task an easier one.

Administrator.

Map of the State.....	Page 230
TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	231
2. All classes by race, age, and sex	232
3. All classes by occupational group, race, age, and sex	234
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm)	238
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937	239
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months	240
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	241
8. All classes by sex and industry group.....	242
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	246
11. All classes by age and sex.....	252
13. All classes by occupational group and sex.....	258
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	251
12. All classes by age and sex.....	257
14. All classes by occupational group and sex.....	263

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.....	267
2. All classes by race, age, and sex	268
3. All classes by occupational group, race, age, and sex.....	270
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	273
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	273
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	274
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	275
8. All classes by sex and industry group.....	276
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	279
11. All classes by age and sex.....	281
13. All classes by occupational group and sex.....	283
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	280
12. All classes by age and sex.....	282
14. All classes by occupational group and sex.....	284

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	287
2. All classes by race, age, and sex	288
3. All classes by occupational group, race, age, and sex	290
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm) ..	293
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937 ..	293
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months ..	294
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937..	295
8. All classes by sex and industry group.....	296
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population	299
11. All classes by age and sex	305
13. All classes by occupational group and sex.....	311
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	304
12. All classes by age and sex	310
14. All classes by occupational group and sex	316

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE

Table

1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	319
2. All classes by race, age, and sex	321
3. All classes by occupational group, race, age, and sex	325
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm)	333
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937	335
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months	336
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937	339
8. All classes by sex and industry group	340

TABLES FOR COUNTIES

9. All classes by race, sex, and residence, with 1930 population	348
11. All classes by age and sex	354
13. All classes by occupational group and sex	361

TABLES FOR CITIES OF 10,000 OR MORE

10. All classes by race and sex, with 1930 population	352
12. All classes by age and sex	358
14. All classes by occupational group and sex	365

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population	371
2. All classes by race, age, and sex.....	372
3. All classes by occupational group, race, age, and sex.....	374
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	378
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	379
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	380
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	381
8. All classes by sex and industry group.....	382
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	386
11. All classes by age and sex.....	391
13. All classes by occupational group and sex.....	396
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	390
12. All classes by age and sex.....	395
14. All classes by occupational group and sex.....	400

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE

Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.....	435
2. All classes by race, age, and sex.....	436
3. All classes by occupational group, race, age, and sex.....	438
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	441
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	441
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	442
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	443
8. All classes by sex and industry group.....	444

TABLES FOR COUNTIES

9. All classes by race, sex, and residence, with 1930 population.....	447
11. All classes by age and sex.....	449
13. All classes by occupational group and sex.....	450

TABLES FOR CITIES OF 10,000 OR MORE

10. All classes by race and sex, with 1930 population.....	448
12. All classes by age and sex.....	449
14. All classes by occupational group and sex.....	451

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.....	463
2. All classes by race, age, and sex.....	464
3. All classes by occupational group, race, age, and sex.....	467
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	473
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937..	474
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	475
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	477
8. All classes by sex and industry group.....	478
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	484
11. All classes by age and sex.....	490
13. All classes by occupational group and sex.....	496
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	489
12. All classes by age and sex.....	495
14. All classes by occupational group and sex.....	501

TABLES FOR THE STATE, FOR EACH CITY OF 100,000 OR MORE, FOR CITIES OF 10,000 TO 100,000 AS A GROUP, AND FOR THE REMAINDER OF THE STATE	
Table	
1. All classes (totally unemployed, emergency workers, and partly unemployed) by race and sex, with 1930 population.....	505
2. All classes by race, age, and sex.....	506
3. All classes by occupational group, race, age, and sex.....	508
4. All classes by sex, number of dependents, number of other workers in family, and residence (farm or nonfarm).....	512
5. Totally unemployed and partly unemployed by sex, number of weeks worked during preceding 12 months, and income during week of November 7-13, 1937.....	513
6. Totally unemployed and partly unemployed by sex, occupational group, and number of weeks worked during preceding 12 months.....	514
7. Partly unemployed by sex and hours worked during week of November 7-13, 1937.....	515
8. All classes by sex and industry group.....	516
TABLES FOR COUNTIES	
9. All classes by race, sex, and residence, with 1930 population.....	520
11. All classes by age and sex.....	531
13. All classes by occupational group and sex.....	542
TABLES FOR CITIES OF 10,000 OR MORE	
10. All classes by race and sex, with 1930 population.....	530
12. All classes by age and sex.....	541
14. All classes by occupational group and sex.....	552
